

**CONTROLLED FUSION AND PLASMA HEATING
17th EUROPEAN PHYSICAL SOCIETY
PLASMA PHYSICS DIVISION CONFERENCE**

CONTENTS

F. C. SCHÜLLER: Preface	v
CH. MAISONNIER: Opening address.....	vii
H. CHANG: Opening address	ix
K. J. DIETZ and THE JET TEAM: Effect of beryllium on plasma performance in JET ..	837
JT-60 TEAM (presented by K. USHIGUSA): Recent results of LH experiments on the JT-60 Tokamak	853
J. L. LUXON <i>et al.</i> : Recent results from DIII-D and their implications for next generation Tokamaks	869
A. M. MESSIAEN <i>et al.</i> : High power ICRH and NB heating results in TEXTOR	889
S. C. PRAGER: Transport and fluctuations in reversed field pinches	903
X. GARBET, F. MOURGUES and A. SAMAIN: Magnetic turbulence and anomalous transport	917
H. RINGLER <i>et al.</i> : Confinement studies on the Wendelstein VII-AS stellarator	933

THE JET TEAM (presented by D. J. CAMPBELL): Confinement and stability in JET: recent results	949
V. MERTENS <i>et al.</i> : Physics of enhanced confinement with peaked and broad density profiles	965
N. J. LOPES CARDOZO <i>et al.</i> : Tokamak transport studies using perturbation analysis	983
D. D. RYUTOV: Mirror type neutron source	999
A. GROSMAN <i>et al.</i> : Plasma edge control in TORE SUPRA.....	1011
S. NAKAI: Symmetry in inertial confinement fusion implosion	1029
J. F. LYON: Review of recent stellarator results in the U.S.A., the U.S.S.R., and Japan	1041
S. V. BAZDENKOV, A. V. GRUZINOV and O. P. POGUTSE: On the marfe theory.....	1061
J. S. SHLACHTER: Solid D ₂ fiber experiments on HDZP-II	1073
THE JET TEAM (presented by A. GIBSON): Fusion relevant performance in JET	1083
F. ENGELMANN: Extrapolation of Tokamak energy confinement to Next Step devices	1101
