

CONTENTS

Foreword	
1. Photo	1
2. Data	2
3. Conference Program	3
4. Presentation	
Zero-Emission Electric Vehicle System for Tokyo Metro Area Ken-ichi Ueda (The University of Electro-Communications, Japan)	19
Nature-Inspired Surface Science for Energy Hiroshi Sakaguchi (IAE, Kyoto University, Japan)	33
Overview of Electric Power Safety Policy in Japan towards use of Renewable Energy Koichi Shiraga (Ministry of Economy, Trade and Industry, Japan)	37
Introduction to the School of Energy Engineering at Zhejiang University Liwu Fan (Zhejiang University, China)	44
Current Status of the Chinese ADS Project and the Development of SIMP Steel Wang Zhiguang (Chinese Academy of Sciences, China)	51
Modeling and Simulation on Irradiation Effects of Blanket Structural Material in Nuclear Fusion Reactor Yoshiyuki Watanabe (National Institutes for Quantum and Radiological Science and Technology, Japan)	60
Synergistic Effects of Displacement Damages and Helium in Fusion Reactor Structural Materials - Studies using DuET Facility Takuya Yamamoto (University of California, Santa Barbara, USA)	65
Dynamics of Turbulence in Magnetically Confined Fusion Plasmas George R. McKee (University of Wisconsin-Madison, USA)	70
Zeeman Spectroscopy for the Tomographic Measurement of Magnetically Confined Plasmas Taiichi Shikama (Kyoto University, Japan)	78

Compact Neutron Generator with Inertial Electrostatic Confinement Fusion for Nuclear Application Kei Takakura (Toshiba Energy Systems & Solutions Corporation, Japan)	85
New Photocatalysts Based on Layered Complex Oxides Yalin Lu (The University of Science and Technology of China, China)	93
Van der Waals Epitaxy of Nitride Semiconductors towards Energy Conversion Devices Shinichiro Mouri (Ritsumeikan University, Japan)	106
Materials Science for Printable Perovskite Solar Cells Atsushi Wakamiya (Kyoto University, Japan)	113
Molecular Insights into the Enzymatic Oxidation of Polysaccharides by Lytic Polysaccharide Monooxygenases Paul Walton (University of York, UK)	123
Structure and Function of Dioxygenases in the Lignin Degradation Pathway of Sphingobium sp. SYK-6 Toshiya Senda (High Energy Accelerator Research Organization (KEK), Japan)	139
Development of Intracellular Thermosensors for the Understanding of Energy Production in Mitochondria Reiko Sakaguchi (Kyoto University, Japan)	151
From Atom to Microgrid – New Perspectives for Electrochemical Energy Storage Shirley Meng (University of California San Diego, USA)	158
Electrode Designs for High-Performance Batteries Based on Operand Analysis Using Synchrotron X-Ray ~ Toward Efficient Uses of Sustainable Energy ~ Koji Amezawa (Tohoku University, Japan)	168
Study on Development of Compound-Based Anode for Alkali-Metal-Ion Batteries and on Compatibility with Molten Salt Electrolyte Yasuhiro Domi (Tottori University, Japan)	174

5. Panel Discussion

Zero-Emission Energy	183
Moderator: Toshiyuki Nohira (IAE, Kyoto University)	
Panelist: George R. McKee (University of Wisconsin-Madison, USA)	
Shirley Meng (University of California San Diego, USA)	
Paul Walton (University of York, UK)	

6. Parallel Seminar, Satellite Meeting

Topical Seminar on Beam Emission and Advanced Spectrometries for Fusion Plasmas	195
The Reaction Mechanism of the Copper Histidine Brace in LPMOs Paul Walton (University of York, UK)	196
Innovative Strategy for Highly Efficient Utilization of Solar Energy	197
Workshop on CSR and Free Electron Lasers from Ultra Short Bunch Electron Beam (Satellite Meeting)	199

7. Poster Session

203
