CONTENTS

1.	Seminar Program	1			
2.	Parallel Seminar I				
	Topical Seminar on Beam Emission and Advanced Spectrometries for Fusion Plasmas	7			
	Application of Spectroscopy in the Analysis of Impurity Behavior in Fusion Plasm	as			
	Tetsutarou Oishi (National Institute for Fusion Science, Japan)	11			
	Study of Pellet Ablation Cloud via Spatially Resolved Spectroscopic Observation				
	Motoshi Goto (National Institute for Fusion Science, Japan)	·· 17			
	Near-infrared Zeeman Spectroscopy for the Spatially Resolved Measurement of Helium Emission Spectr	ra			
	Taiichi Shikama (Kyoto University, Japan)	23			
	Dynamics in Dipole Plasmas Using Coherence Imaging Spectroscopy Masaki Nishiura (The University of Tokyo, Japan)	27			
	Active Spectroscopy Techniques for Fluctuation Imaging Measurements				
	George R. McKee (University of Wisconsin-Madison, USA)	33			
	Characteristics of ELMs in KSTAR with and without RMPs Measured by Beam Emission Spectroscopy				
	Young-chul Ghim (KAIST, Deajeon, S. Korea)	45			
	Development of Beam Emission Spectroscopy in Helical Plasmas and its Application for Physics Studi	es			
	Tatsuya Kobayashi (National Institute for Fusion Science, Japan)	57			
	Development of Active Beam Spectroscopy in Heliotron J				
	Shinji Kobayashi (IAE, Kyoto University, Japan)	65			
	Observation of Distorted Maxwell-Boltzmann Distribution				
	of Epithermal Ions Using Charge Exchange Spectrosco	эру			
	Kasumi Ida (National Institute for Fusion Science, Japan)	73			

3.	Parallel Seminar II		
	The Reaction Mechanism of the Copper Histidine Brace in LPMOs Paul Walton (University of York, UK)		79
4.	Parallel Seminar III		
	"Innovative strategy for Highly Efficient Utilization of Solar Energy" (MEXT Special Budget Symposium)		99
	Significance of the Reaction by Spatially Organized Enzymes Takashi Morii (IAE)		103
	Helical Nanopore Formation Caused by Chiral Symmetry Breaking in Metal-Assisted Chemical Etching o	of Silicon	
	Kazuhiro Fukami and Tetsuo Sakka (Kyoto University)	•••••	107
	Electrodeposition of Si, Ti and W from Water-Soluble KF-KCl Molten Salts Toshiyuki Nohira (IAE)		113
	Nature-Inspired Surface Science for Energy Hiroshi Sakaguchi (IAE)		119
	Novel Light-matter Interaction in Low-dimensional Materials	ations	
	Kazunari Matsuda (IAE)		127
	Further Improvement of Photovoltaic Performance of Polythiophene/Antimony Sulfide Planar S	Solar Cel	ls
	Mayumi Yukawa, Akinobu Hayakawa, Takashi Sagawa (Kyoto Unive	ersity)…	131
	Rapid In-situ Synthesis of Metal-polymer Nanocomposites		
	Takashi Nakajima (IAE)		133
	Energy Material Research in KU-FEL Heishun Zen, Hideaki Ohgaki (IAE)	•••••	139
	Heterologous Expression and Characterization of Enzymes of Wood Rotting Fungi to be used for Utilization of Woody	Biomass	
	Masato Katahira (IAE)	••••••	145

5.	S	atellite	Meeting

Workshop on Generation and Application of High Brightness Electron Beam					
Invited Lecture: Structured Light from Electron Beam Masahiro Katoh (Institute for Molecular Science)		155			
Introduction of the Laser Intensity Measurement System for the FELiChEM Feiliang Gao (USTC)		161			
Design of a High Repetition Rate Electron Gun for IR-FEL Yuanqi Cai (USTC)		167			
A Ten-Bend-Achromat Lattice for a Diffraction-Limited Storage Ring Ligh Penghui Yang (USTC)	nt Source	173			
Mitigation of the Space Charge Effect for Improving the Performance of THz-Cur Source					
Siriwan Krainara (IAE)		177			
D Control System Design for Front End Devices of IR-FEL Shuang Xu (USTC)		181			
Laser Pulse Shaping System to Improve the Performance					
of THz Coherent Undulator Radiation Source driven by a Photocathod Shuya Chatani (IAE)	e RF gun	185			
Deposition and Characterization of TiZrHfV Films by DC Magnetron Sputte Xiaoqin Ge (USTC)	ring	189			
Application of Liquid Membrane-FTIR in Mechanism Investigation of Degradative Solvent Extraction of Biomass					
Watcharakorn Ketren (IAE)		193			
The kicker's design of HALS Wei Liu (USTC)		201			
The application of mid infrared photoacoustic spectroscopy technique to investigate the solvent soluble of biomass using KU-FEL					
Chandra Shekar Chandu (VTU/ Kyoto University)	•••••	205			
A study of the Cavity Bunch Length Monitor Qian Wang (USTC)		209			
R&D of Vibration Wire Alignment Technique for HALS Wei Wang (USTC)		217
