

Contents

I. Introduction	1
I.1 Fusion energy.....	1
I.2 Plasma confinement concepts.....	5
I.3 Tokamak.....	8
I.4 Koreas Superconducting Tokamak Advanced Researches (KSTAR).....	13
I.4.1 Overview of KSTAR	13
I.4.2 Heating systems for KSTAR	15
I.4.3 Diagnostics system for KSTAR.....	16
II. Classical and Neoclassical transport theory.....	24
II.1 Classical transport	25
II.2 Neoclassical transport.....	32
II.2.1 Pfirsh-Schluter regime.....	34
II.2.2. Banana regime	36
II.2.3 Plateau regime	37
II. 3 Neoclassical theory for plasma rotation.....	38
II. 4 MHD rotation	41
III. Momentum transport study	44
III.1 Introduction.....	44
III.2 Experimental observations and results	45
III.2.1 NBI.....	45
III.2.2. ICRH.....	49
III.2.3. ECRH.....	53
III.2.4 Ohmic plasmas	55
III.2.5 Error field.....	57
III.3 Theoretical models for plasma rotation.....	62
III.3.1 Residual stress	63
III.3.2 Momentum pinch.....	70
III.3.3 Neoclassical toroidal viscosity.....	72
IV. Charge Exchange Spectroscopy on the KSTAR	81
IV.1 Introduction.....	81
IV.2 Principle.....	82

IV.3 Charge exchange spectroscopy on the KSTAR.....	89
IV.3.1 Introduction.....	89
IV.3.2 Optics.....	90
IV.3.3 NBI system	95
IV.3.4 Spectrometers.....	97
IV.3.5 CCD control system.....	106
IV.3.6 Data archiving system	109
IV.3.7 Data analysis system.....	110
IV.3.8 Uncertainties on the charge exchange spectrum	121
V. Dynamics of ion temperature and toroidal rotation profiles in KSTAR plasmas.....	131
V.1 Sawtooth oscillation.....	131
V.2 Mode locking	134
V.3 Ohmic plasma.....	142
V.4 Toroidal rotation damping during ECRH	145
V.5 Toroidal rotation damping by non-resonant magnetic perturbations	155
V.6 LH transition and H-L back transition	158
VI. Transport analysis	166
VI.1 Electron and ion heat balance equations.....	166
VI.2 Momentum balance equation	173
VI.3 Normalized poloidal flux and toroidal flux	174
VI.4 Transport analysis results from NBI-heated L-mode and H-mode plasmas.....	176
VII. ECRH effects on the toroidal rotation	189
VII.1 Toroidal rotation speed reduction in co-current directed rotating plasma	190
VII.2 Toroidal rotation speed reduction in counter-current directed rotating plasma.....	191
VII.3 Observation of internal kink modes.....	193
VII.4 NTV torque induced by internal kink mode during on-axis ECRH heating	196
VII.5 The evolution of the toroidal rotation profiles simulated with the NTV torque density	198
VII.6 Conclusions and discussions	204
VIII. Summary and Discussions (not included yet).....	206
References (not finished yet).....	207
