

TABLE OF CONTENTS

Section	Page
1. Summary	5
2. Introduction	7
3. Principle of charge exchange spectroscopy and application to JET data	15
3.1 General remarks	15
3.2 Emissivity	15
3.3 CXRS cross-sections	19
3.4 Neutral beam and particle density	25
3.5 Beam attenuation	27
3.6 Competitive processes	35
3.6.1 CX-Radiation induced by thermal halo neutrals	35
3.6.2 Background of continuum and line radiation	38
3.6.3 Signal deterioration by plume effects	91

Section	Page
4. Active beam diagnostic on JET	44
4.1 Specification and feasibility of diagnostic aims	44
4.1.1 Active neutral particle analysis	44
4.1.2 Charge Exchange Recombination Spectroscopy	52
4.2 Layout of heating beams and lines of sight	67
4.3 Modulation of heating beams	83
5. Merits of a dedicated diagnostic neutral beam	84
6. Conclusions	87
7. References	89
