<i>Acronyms</i>	<i>page</i> ix
<i>Notation</i>	xiii
<i>Preface</i>	xv
1 Introduction to the World of Sparsity	1
1.1 Sparse Representation	1
1.2 From Fourier to Wavelets	5
1.3 From Wavelets to Overcomplete Representations	6
1.4 Novel Applications of the Wavelet and Curvelet Transforms	8
1.5 Summary	15
2 The Wavelet Transform	16
2.1 Introduction	16
2.2 The Continuous Wavelet Transform	16
2.3 Examples of Wavelet Functions	18
2.4 Continuous Wavelet Transform Algorithm	21
2.5 The Discrete Wavelet Transform	22
2.6 Nondyadic Resolution Factor	28
2.7 The Lifting Scheme	31
2.8 Wavelet Packets	34
2.9 Guided Numerical Experiments	38
2.10 Summary	44
3 Redundant Wavelet Transform	45
3.1 Introduction	45
3.2 The Undecimated Wavelet Transform	46
3.3 Partially Decimated Wavelet Transform	49
3.4 The Dual-Tree Complex Wavelet Transform	51
3.5 Isotropic Undecimated Wavelet Transform: Starlet Transform	53
3.6 Nonorthogonal Filter Bank Design	58
3.7 Pyramidal Wavelet Transform	64

3.8	Guided Numerical Experiments	69	8.6	Texture-Cartoon Separation	198
3.9	Summary	74	8.7	Inpainting	204
4	Nonlinear Multiscale Transforms	75	8.8	Guided Numerical Experiments	210
4.1	Introduction	75	8.9	Summary	216
4.2	Decimated Nonlinear Transform	75	9	Sparse Blind Source Separation	218
4.3	Multiscale Transform and Mathematical Morphology	77	9.1	Introduction	218
4.4	Multiresolution Based on the Median Transform	81	9.2	Independent Component Analysis	220
4.5	Guided Numerical Experiments	86	9.3	Sparsity and Multichannel Data	224
4.6	Summary	88	9.4	Morphological Diversity and Blind Source Separation	226
5	The Ridgelet and Curvelet Transforms	89	9.5	Illustrative Experiments	237
5.1	Introduction	89	9.6	Guided Numerical Experiments	242
5.2	Background and Example	89	9.7	Summary	244
5.3	Ridgelets	91	10	Multiscale Geometric Analysis on the Sphere	245
5.4	Curvelets	100	10.1	Introduction	245
5.5	Curvelets and Contrast Enhancement	110	10.2	Data on the Sphere	246
5.6	Guided Numerical Experiments	112	10.3	Orthogonal Haar Wavelets on the Sphere	248
5.7	Summary	118	10.4	Continuous Wavelets on the Sphere	249
6	Sparsity and Noise Removal	119	10.5	Redundant Wavelet Transform on the Sphere with Exact Reconstruction	253
6.1	Introduction	119	10.6	Curvelet Transform on the Sphere	261
6.2	Term-By-Term Nonlinear Denoising	120	10.7	Restoration and Decomposition on the Sphere	266
6.3	Block Nonlinear Denoising	127	10.8	Applications	269
6.4	Beyond Additive Gaussian Noise	132	10.9	Guided Numerical Experiments	272
6.5	Poisson Noise and the Haar Transform	134	10.10	Summary	276
6.6	Poisson Noise with Low Counts	136	11	Compressed Sensing	277
6.7	Guided Numerical Experiments	143	11.1	Introduction	277
6.8	Summary	145	11.2	Incoherence and Sparsity	278
7	Linear Inverse Problems	149	11.3	The Sensing Protocol	278
7.1	Introduction	149	11.4	Stable Compressed Sensing	280
7.2	Sparsity-Regularized Linear Inverse Problems	151	11.5	Designing Good Matrices: Random Sensing	282
7.3	Monotone Operator Splitting Framework	152	11.6	Sensing with Redundant Dictionaries	283
7.4	Selected Problems and Algorithms	160	11.7	Compressed Sensing in Space Science	283
7.5	Sparsity Penalty with Analysis Prior	170	11.8	Guided Numerical Experiments	285
7.6	Other Sparsity-Regularized Inverse Problems	172	11.9	Summary	286
7.7	General Discussion: Sparsity, Inverse Problems, and Iterative Thresholding	174	<i>References</i>		289
7.8	Guided Numerical Experiments	176	<i>List of Algorithms</i>		311
7.9	Summary	178	<i>Index</i>		313
8	Morphological Diversity	180			
8.1	Introduction	180			
8.2	Dictionary and Fast Transformation	183			
8.3	Combined Denoising	183			
8.4	Combined Deconvolution	188			
8.5	Morphological Component Analysis	190
