## Contents

1	Introduction		1
2	Electromagnetic Scattering		4
	2.1	Maxwell's Equations	4
	2.2	Interface Conditions	6
	2.3	Constitutive Equations	7
	2.4	Wave Equations and Their Solutions	9
	2.5	Volume Scattering by Dielectric Targets	14
	2.6	Volume Equivalence Principle	16
	2.7	Integral Equations	18
	2.8	Surface Scattering by Perfectly Electric Conducting Targets	19
		References	19
3	The Electromagnetic Inverse Scattering Problem		
	3.1	Introduction	20
	3.2	Three-Dimensional Inverse Scattering	22
	3.3	Two-Dimensional Inverse Scattering	24
	3.4	Discretization of the Continuous Model	28
	3.5	Scattering by Canonical Objects: The Case of Multilayer Elliptic Cylinders	41
		References	53
			v

4	Imag	ing Configurations and Model Approximations	57
	4.1	Objectives of the Reconstruction	57
	4.2	Multiillumination Approaches	58
	4.3	Tomographic Configurations	59
	4.4	Scanning Configurations	63
	4.5	Configurations for Buried-Object Detection	65
	4.6	Born-Type Approximations	65
	4.7	Extended Born Approximation	68
	4.8	Rytov Approximation	70
	4.9	Kirchhoff Approximation	73
	4.10	Green's Function for Inhomogeneous Structures	73
		References	77
5	Qua	litative Reconstruction Methods	79
	5.1	Introduction	79
	5.2	Generalized Solution of Linear Ill-Posed Problems	80
	5.3	Regularization Methods	82
	5.4	Singular Value Decomposition	84
	5.5	Singular Value Decomposition for Solving Linear Problems	87
	5.6	Regularized Solution of a Linear System Using Singular Value Decomposition	90
	5.7	Qualitative Methods for Object Localization and Shaping	91
	5.8	The Linear Sampling Method	92
	5.9	Synthetic Focusing Techniques	101
	5.10	Qualitative Methods for Imaging Based on Approximations	103
	5.11	Diffraction Tomography	103
	5.12	Inversion Approaches Based on Born-Like Approximations	108
	5.13	The Born Iterative Method	117
	5.14	Reconstruction of Equivalent Current Density	118
		References	119

6	Qua	antitative Deterministic Reconstruction Methods	123
	6.1	Introduction	123
	6.2	Inexact Newton Methods	125
	6.3	The Truncated Landweber Method	127
	6.4	Inexact Newton Method for Electric Field Integral Equation Formulation	129
	6.5	Inexact Newton Method for Contrast Source Formulation	136
	6.6	The Distorted Born Iterative Method	142
	6.7	Inverse Scattering as an Optimization Problem	147
	6.8	Gradient-Based Methods	148
		References	150
7	Quantitative Stochastic Reconstruction Methods		
	7.1	Introduction	153
	7.2	Simulated Annealing	154
	7.3	The Genetic Algorithm	158
	7.4	The Differential Evolution Algorithm	170
	7.5	Particle Swarm Optimization	177
	7.6	Ant Colony Optimization	180
	7.7	Code Parallelization	187
		References	189
8	Hył	orid Approaches	193
	8.1	Introduction	193
	8.2	The Memetic Algorithm	195
	8.3	Linear Sampling Method and Ant Colony Optimization	201
		References	203
9	Microwave Imaging Apparatuses and Systems		
	9.1	Introduction	205
	9.2	Scanning Systems for Microwave Tomography	205
	9.3	Antennas for Microwave Imaging	211

## viii Contents

	9.4	The Modulated Scattering Technique and Microwave Cameras	214
		References	226
10	App	ications of Microwave Imaging	229
	10.1	Civil and Industrial Applications	229
	10.2	Medical Applications of Microwave Imaging	241
	10.3	Shallow Subsurface Imaging	252
		References	258
11	Microwave Imaging Strategies, Emerging Techniques, and Future Trends		264
	11.1	Introduction	264
	11.2	Potentialities and Limitations of Three-Dimensional Microwave Imaging	265
	11.3	Amplitude-Only Methods	269
	11.4	Support Vector Machines	269
	11.5	Metamaterials for Imaging Applications	272
	11.6	Through-Wall Imaging	274
