

# CONTENTS

Editor's Foreword	vii
Preface	x
1 Introduction, Literature Survey and Critique of the APW Method	1
1-1 Introduction	1
1-2 Literature Survey	4
1-3 Critique of the APW Method	8
2 Theoretical Discussion of the APW Method	16
2-1 Periodic Potential	16
2-2 Muffin-Tin Model of the Crystal Potential	18
2-3 APW Function	20
2-4 Variational Expression for the Energy	24
2-5 APW Matrix Elements	29
3 Practical Aspects of the APW Method	38
3-1 Crystal Structure and Reciprocal Lattice	38
3-2 Muffin-Tin Potential	47
3-3 Logarithmic Derivatives	56
3-4 Spherical Bessel Functions and Legendre Polynomials	66
3-5 Secular Determinant and Eigenvalues	68
3-6 Eigenfunctions	70
3-7 Summary	72
4 Relativistic APW Method	73
4-1 RAPW Function	73
4-2 Variational Expression for the Energy	78
4-3 RAPW Matrix Elements	81
4-4 Practical Aspects of the RAPW Method	90
Appendix 1. Numerical Solution of Poisson's Equation	98
Appendix 2. Muffin-Tin Potential Program	105
Appendix 3. Logarithmic Derivative Subroutine	112

CONTENTS	xiii
Appendix 4. Spherical Bessel Function Subroutine	120
Appendix 5. APW Programs	123
Appendix 6. Simplification of the Coefficients $D_{\kappa}^{ij}(\frac{n}{m})$	128
Appendix 7. $cf_{\kappa}/g_{\kappa}$ Subroutine	133
Appendix 8. Relativistic APW Programs	136
References	146

## Reprints

Wave Functions in a Periodic Potential, by J. C. Slater • Phys. Rev. <u>51</u> , 846 (1937)	151
Energy Bands in Fe via the APW Method, by J. H. Wood • Phys. Rev. <u>126</u> , 517 (1962)	157
Energy Band Structure of Cu, by G. A. Burdick • Phys. Rev. <u>129</u> , 138 (1963)	168
Relativistic Effects in the Band Structure of PbTe, by L. E. Johnson, J. B. Conklin, Jr. and G. W. Pratt, Jr. • Phys. Rev. Letters <u>11</u> , 538 (1963)	181
Energy Bands for Solid Argon, by L. F. Mattheiss • Phys. Rev. <u>133</u> , A1399 (1964)	184
The Fermi Surface of Beryllium, by J. H. Terrell • Phys. Rev. Letters <u>8</u> , 149 (1964)	189
Energy Bands for the Iron Transition Series, by L. F. Mattheiss • Phys. Rev. <u>134</u> , A970 (1964)	192
Estimate of the Spin-Orbit Parameter $\xi_{5d}$ in Tungsten, by L. F. Mattheiss and R. E. Watson • Phys. Rev. Letters <u>13</u> , 526 (1964)	196
Band Structure and Magnetism of Gadolinium Metal, by J. O. Dimmock and A. J. Freeman • Phys. Rev. Letters <u>13</u> , 750 (1964)	199
Electronic Band Structure of TiC, TiN and TiO, by V. Ern and A. C. Switendick • Phys. Rev. <u>137</u> , A1927 (1965)	202
Relativistic Energy Bands for Tungsten, by T. L. Loucks • Phys. Rev. Letters <u>14</u> , 693 (1965)	212

Relativistic Energy Bands for Lead by the Relativistic APW Method, by T. L. Loucks • Phys. Rev. Letters <u>14</u> , 1072 (1965)	214
Band Structure of Silver Chloride and Silver Bromide, by Peter M. Scop • Phys. Rev. <u>139</u> , A934 (1965)	216
Fermi Surfaces of Cr, Mo, and W by the APW Method, by T. L. Loucks • Phys. Rev. <u>139</u> , A1181 (1965)	223
Relativistic Electronic Structure in Crystals. I. Theory, by T. L. Loucks • Phys. Rev. <u>139</u> , A1333 (1965)	231
Fermi Surface in Tungsten, by L. F. Mattheiss • Phys. Rev. <u>139</u> , A1893 (1965)	236
Relativistic Electronic Structure in Crystals. II. Fermi Surface of Tungsten, by T. L. Loucks • Phys. Rev. <u>143</u> , 506 (1966)	248
Epilogue	255
