Preface to the first edition	xiii

Introduction

Universality in Chaos	3
P Cvitanović	

Part 1: Introductory articles

Strange attractors	37
D Ruelle	
<i>Math. Intelligencer</i> 2 126 (1980)	
Universal behavior in nonlinear systems	49
M J Feigenbaum	
<i>Los Alamos Science</i> 1 4 (1980)	
Simple mathematical models with very complicated dynamics	85
R M May	
<i>Nature</i> 261 459 (1976)	
Roads to turbulence in dissipative dynamical systems	94
J-P Eckmann	
<i>Rev. Mod. Phys.</i> 53 643 (1981)	

Part 2: Experiments

2.1: Fluid mechanics

A Rayleigh Bénard experiment: helium in a small box	109
A Libchaber and J Maurer	
<i>Proceedings of the NATO Advanced Studies Institute on Nonlinear Phenomena at Phase Transitions and Instabilities</i> p 259 (1982)	
Period doubling cascade in mercury, a quantitative measurement	137
A Libchaber, C Laroche and S Fauve	
<i>J. Phys. Lett.</i> 43 L211 (1982)	
Onset of turbulence in a rotating fluid	143
J P Gollub and H L Swinney	
<i>Phys. Rev. Lett.</i> 35 927 (1975)	

Transition to chaotic behavior via a reproducible sequence of period-doubling bifurcations	146	Part 3: Theory	
M Giglio, S Musazzi and U Perini		3.1: Qualitative universality in one dimension	
<i>Phys. Rev. Lett.</i> 47 243 (1981)		On finite limit sets for transformations on the unit interval	187
Intermittency in Rayleigh–Bénard convection	149	M Metropolis, M L Stein and P R Stein	
P Bergé, M Dubois, P Manneville and Y Pomeau		<i>J. Combinatorial Theory (A)</i> 15 25 (1973)	
<i>J. Phys. Lett.</i> 41 L341 (1980)			
2.2: Chemical systems		3.2: Quantitative universality for one-dimensional period-doublings	
Representation of a strange attractor from an experimental study of chemical turbulence	154	The universal metric properties of nonlinear transformations	207
J C Roux, A Rossi, S Bachelart and C Vidal		M J Feigenbaum	
<i>Phys. Lett.</i> 77A 391 (1980)		<i>J. Stat. Phys.</i> 21 669 (1979)	
Chaos in the Belousov–Zhabotinskii reaction	157	A computer-assisted proof of the Feigenbaum conjectures	245
J L Hudson and J C Mankin		O E Lanford III	
<i>J. Chem. Phys.</i> 74 6171 (1981)		<i>Bull. Am. Math. Soc.</i> 6 427 (1982)	
One-dimensional dynamics in a multicomponent chemical reaction	164	3.3: Subharmonic spectrum	
R H Simoyi, A Wolf and H L Swinney		The transition to aperiodic behavior in turbulent systems	253
<i>Phys. Rev. Lett.</i> 49 245 (1982)		M J Feigenbaum	
Intermittent behaviour in the Belousov–Zhabotinsky reaction	167	<i>Commun. Math. Phys.</i> 77 65 (1980)	
Y Pomeau, J C Roux, A Rossi, S Bachelart and C Vidal		Universality and the power spectrum at the onset of chaos	276
<i>J. Phys. Lett.</i> 42 L271 (1981)		M Nauenberg and J Rudnick	
2.3: Optical experiments		<i>Phys. Rev. B</i> 24 493 (1981)	
Experimental evidence of subharmonic bifurcations, multistability, and turbulence in a Q-switched gas laser	170	Part 4: Noise	
F T Arechi, R Meucci, G Puccioni and J Tredicce		4.1: Deterministic noise	
<i>Phys. Rev. Lett.</i> 49 1217 (1982)		Invariant distributions and stationary correlation functions of one-dimensional discrete processes	281
2.4: Electronic experiments		S Grossmann and S Thomae	
Evidence for universal chaotic behavior of a driven nonlinear oscillator	174	<i>Z. Naturf. a</i> 32 1353 (1977)	
J Testa, J Pérez and C Jeffries		Noisy periodicity and reverse bifurcation	292
<i>Phys. Rev. Lett.</i> 48 714 (1982)		E N Lorenz	
2.5: Biological experiments		<i>Ann. NY Acad. Sci.</i> 357 282 (1980)	
Phase locking, period-doubling bifurcations, and irregular dynamics in periodically stimulated cardiac cells	178	Scaling behavior of chaotic flows	302
M R Guevara, L Glass and A Shrier		B A Huberman and J Rudnick	
<i>Science</i> 214 1350 (1981)		<i>Phys. Rev. Lett.</i> 45 154 (1980)	

Universal power spectra for the reverse bifurcation sequence A Wolf and J Swift <i>Phys. Lett.</i> 83A 184 (1981)	305	Universal effects of dissipation in two-dimensional mappings A B Zisook <i>Phys. Rev. A</i> 24 1640 (1981)	350
Power spectra of strange attractors B A Huberman and A B Zisook <i>Phys. Rev. Lett.</i> 46 626 (1981)	308	Period doubling bifurcations for families of maps on \mathbb{R}^n P Collet, J-P Eckmann and H Koch <i>J. Stat. Phys.</i> 25 1 (1980)	353
Spectral broadening of period-doubling bifurcation sequences J D Farmer <i>Phys. Rev. Lett.</i> 47 179 (1981)	311	Deterministic nonperiodic flow E N Lorenz <i>J. Atmos. Sci.</i> 20 130 (1963)	367
4.2: External noise		Sequences of infinite bifurcations and turbulence in a five-mode truncation of the Navier–Stokes equations V Franceschini and C Tebaldi <i>J. Phys.</i> 21 707 (1979)	379
Fluctuations and the onset of chaos J P Crutchfield and B A Huberman <i>Phys. Lett.</i> 77A 407 (1980)	314	Power spectral analysis of a dynamical system J Crutchfield, D Farmer, N Packard, R Shaw, G Jones and R J Donnelly <i>Phys. Lett.</i> 76A 1 (1980)	399
Scaling theory for noisy period-doubling transitions to chaos B Shraiman, C E Wayne and P C Martin <i>Phys. Rev. Lett.</i> 46 935 (1981)	317		
Scaling for external noise at the onset of chaos J Crutchfield, M Nauenberg and J Rudnick <i>Phys. Rev. Lett.</i> 46 933 (1981)	321		
Part 5: Intermittency		Part 7: Beyond the one-dimensional theory	
Intermittent transition to turbulence in dissipative dynamical systems Y Pomeau and P Manneville <i>Commun. Math. Phys.</i> 74 189 (1980)	327	Scaling behavior in a map of a circle onto itself: empirical results S J Shenker <i>Physica</i> 5D 405 (1982)	405
Intermittency in the presence of noise: a renormalization group formulation J E Hirsch, M Nauenberg and D J Scalapino <i>Phys. Lett.</i> 87A 391 (1982)	336	Period doubling as a universal route to stochasticity R S MacKay <i>Long-Time Prediction in Dynamics</i> p 127 (1983)	412
Part 6: Period-doubling in higher dimensions		Self-generated chaotic behavior in nonlinear mechanics R H G Helleman <i>Fundamental Problems in Statistical Mechanics</i> 5 165 (1980)	420
A two-dimensional mapping with a strange attractor M Hénon <i>Commun. Math. Phys.</i> 50 69 (1976)	341	Feigenbaum universality and the thermodynamic formalism E B Vul, Ya G Sinai and K M Khanin <i>Russ. Math. Surv.</i> 39 1 (1984)	491

Mode-locking and the transition to chaos in dissipative systems	531
P Bak, T Bohr and M H Jensen	
Phys. Scr. T9 50 (1985)	
Fractal measures and their singularities: the characterization of strange sets	540
T C Halsey, M H Jensen, L P Kadanoff, I Procaccia and B I Shraiman	
Phys. Rev. A 33 1141 (1986)	
Presentation functions, fixed points, and a theory of scaling function dynamics	551
M J Feigenbaum	
J. Stat. Phys. 52 527 (1988)	
Fixed points of composition operators II	594
H Epstein	
Nonlinearity 2 305 (1989)	
Bounded structure of infinitely renormalizable mappings	600
D Sullivan
