CONTENTS

THE GAMMA FUNCTION, Page 1.

1

- 1.1. Definition of the Gamma Function, 1.
- 1.2. Some Relations Satisfied by the Gamma Function, 3.
- 1.3. The Logarithmic Derivative of the Gamma Function, 5.
- 1.4. Asymptotic Representation of the Gamma Function for Large |z|, 8.
- 1.5. Definite Integrals Related to the Gamma Function, 13. Problems, 14.
- 2 THE PROBABILITY INTEGRAL
 - AND RELATED FUNCTIONS, Page 16.
 - 2.1. The Probability Integral and Its Basic Properties, 16.
 - 2.2. Asymptotic Representation of the Probability Integral for Large |z|, 18.
 - 2.3. The Probability Integral of Imaginary Argument. The Function F(z), 19.
 - 2.4. The Probability Integral of Argument $\sqrt{i} x$. The Fresnel Integrals, 21.
 - 2.5. Application to Probability Theory, 23.
 - 2.6. Application to the Theory of Heat Conduction. Cooling of the Surface of a Heated Object, 24.
 - 2.7. Application to the Theory of Vibrations. Transverse Vibrations of an Infinite Rod under the Action of a Suddenly Applied Concentrated Force, 26. Problems, 28.

3 THE EXPONENTIAL INTEGRAL

AND RELATED FUNCTIONS, Page 30.

- 3.1. The Exponential Integral and its Basic Properties, 30.
- 3.2. Asymptotic Representation of the Exponential Integral for Large |z|, 32.
- 3.3. The Exponential Integral of Imaginary Argument. The Sine and Cosine Integrals, 33.
- 3.4. The Logarithmic Integral, 37.
- 3.5. Application to Electromagnetic Theory, Radiation of a Linear Half-Wave Oscillator, 39. Problems, 41.

ORTHOGONAL POLYNOMIALS, Page 43.

- 4.1. Introductory Remarks, 43.
- 4.2. Definition and Generating Function of the Legendre Polynomials, 44.
- 4.3. Recurrence Relations and Differential Equation for the Legendre Polynomials, 46.
- 4.4. Integral Representations of the Legendre Polynomials, 48.
- 4.5. Orthogonality of the Legendre Polynomials, 50.
- 4.6. Asymptotic Representation of the Legendre Polynomials for Large *n*, 51.
- 4.7. Expansion of Functions in Series of Legendre Polynomials, 53.
- 4.8. Examples of Expansions in Series of Legendre Polynomials, 58.
- 4.9. Definition and Generating Function of the Hermite Polynomials, 60.
- 4.10. Recurrence Relations and Differential Equation for the Hermite Polynomials, 61.
- 4.11. Integral Representations of the Hermite Polynomials, 63.
- 4.12. Integral Equations Satisfied by the Hermite Polynomials, 64.
- 4.13. Orthogonality of the Hermite Polynomials, 65.
- 4.14. Asymptotic Representation of the Hermite Polynomials for Large n, 66.
- 4.15. Expansion of Functions in Series of Hermite Polynomials, 68.
- 4.16. Examples of Expansions in Series of Hermite Polynomials, 73.

- 4.17. Definition and Generating Function of the Laguerre Polynomials, 76.
- 4.18. Recurrence Relations and Differential Equation for the Laguerre Polynomials, 78.
- 4.19. An Integral Representation of the Laguerre Polynomials. Relation between the Laguerre and Hermite Polynomials, 80.
- 4.20. An Integral Equation Satisfied by the Laguerre Polynomials, 82.
- 4.21. Orthogonality of the Laguerre Polynomials, 83.
- 4.22. Asymptotic Representation of the Laguerre Polynomials for Large n, 85.
- 4.23. Expansion of Functions in Series of Laguerre Polynomials, 88.
- 4.24. Examples of Expansions in Series of Laguerre Polynomials, 88.
- 4.25. Application to the Theory of Propagation of Electromagnetic Waves. Reflection from the End of a Long Transmission Line Terminated by a Lumped Inductance, 91. Problems, 93.

5 CYLINDER FUNCTIONS: THEORY, Page 98.

- 5.1. Introductory Remarks, 98.
- 5.2. Bessel Functions of Nonnegative Integral Order, 99.
- 5.3. Bessel Functions of Arbitrary Order, 102.
- 5.4. General Cylinder Functions. Bessel Functions of the Second Kind, 104.
- 5.5. Series Expansion of the Function $Y_n(z)$, 106.
- 5.6. Bessel Functions of the Third Kind, 107.
- 5.7. Bessel Functions of Imaginary Argument, 108.
- 5.8. Cylinder Functions of Half-Integral Order, 111.
- 5.9. Wronskians of Pairs of Solutions of Bessel's Equation, 112.
- 5.10. Integral Representations of the Cylinder Functions, 113.
- 5.11. Asymptotic Representations of the Cylinder Functions for Large |z|, 120.
- 5.12. Addition Theorems for the Cylinder Functions, 124.

- 5.13. Zeros of the Cylinder Functions, 126.
- 5.14. Expansions in Series and Integrals Involving Cylinder Functions, 128.
- 5.15. Definite Integrals Involving Cylinder Functions, 131.
- 5.16. Cylinder Functions of Nonnegative Argument and Order, 134.
- 5.17. Airy Functions, 136. Problems, 139.

6 CYLINDER FUNCTIONS: APPLICATIONS, Page 143.

- 6.1. Introductory Remarks, 143.
- 6.2. Separation of Variables in Cylindrical Coordinates, 143.
- 6.3. The Boundary Value Problems of Potential Theory. The Dirichlet Problem for a Cylinder, 146.
- 6.4. The Dirichlet Problem for a Domain Bounded by Two Parallel Planes, 149.
- 6.5. The Dirichlet Problem for a Wedge, 150.
- 6.6. The Field of a Point Charge near the Edge of a Conducting Sheet, 153.
- 6.7. Cooling of a Heated Cylinder, 155.
- 6.8. Diffraction by a Cylinder, 156. Problems, 158.

7 SPHERICAL HARMONICS: THEORY, Page 161.

- 7.1. Introductory Remarks, 161.
- 7.2. The Hypergeometric Equation and Its Series Solution, 162.
- 7.3. Legendre Functions, 164.
- 7.4. Integral Representations of the Legendre Functions, 171.
- 7.5. Some Relations Satisfied by the Legendre Functions, 174.
- 7.6. Series Representations of the Legendre Functions, 176.
- 7.7. Wronskians of Pairs of Solutions of Legendre's Equation, 181.
- 7.8. Recurrence Relations for the Legendre Functions, 183.

- 7.9. Legendre Functions of Nonnegative Integral Degree and Their Relation to Legendre Polynomials, 184.
- 7.10. Legendre Functions of Half-Integral Degree, 186.
- 7.11. Asymptotic Representations of the Legendre Functions for Large |v|, 189.
- 7.12. Associated Legendre Functions, 192. Problems, 199.

SPHERICAL HARMONICS: APPLICATIONS, Page 204.

- 8.1. Introductory Remarks, 204.
- 8.2. Solution of Laplace's Equation in Spherical Coordinates, 205.
- 8.3. The Dirichlet Problem for a Sphere, 206.
- 8.4. The Field of a Point Charge Inside a Hollow Conducting Sphere, 208.
- 8.5. The Dirichlet Problem for a Cone, 210.
- 8.6. Solution of Laplace's Equation in Spheroidal Coordinates, 213.
- 8.7. The Dirichlet Problem for a Spheroid, 215.
- 8.8. The Gravitational Attraction of a Homogeneous Solid Spheroid, 218.
- 8.9. The Dirichlet Problem for a Hyperboloid of Revolution, 220.
- 8.10. Solution of Laplace's Equation in Toroidal Coordinates, 221.
- 8.11. The Dirichlet Problem for a Torus, 224.
- 8.12. The Dirichlet Problem for a Domain Bounded by Two Intersecting Spheres, 227.
- 8.13. Solution of Laplace's Equation in Bipolar Coordinates, 230.
- 8.14. Solution of Helmholtz's Equation in Spherical Coordinates, 234. Problems, 235.

Q HYPERGEOMETRIC FUNCTIONS, Page 238.

- 9.1. The Hypergeometric Series and Its Analytic Continuation, 238.
- 9.2. Elementary Properties of the Hypergeometric Function, 241.
- 9.3. Evaluation of $\lim_{z \to 1^{-}} F(\alpha, \beta; \gamma; z)$ for Re $(\gamma - \alpha - \beta) > 0, 243.$

- 9.4. $F(\alpha, \beta; \gamma; z)$ as a Function of its Parameters, 245.
- 9.5. Linear Transformations of the Hypergeometric Function, 246.
- 9.6. Quadratic Transformations of the Hypergeometric Function, 250.
- 9.7. Formulas for Analytic Continuation of F(α, β; γ; z) in Exceptional Cases, 256.
- 9.8. Representation of Various Functions in Terms of the Hypergeometric Function, 258.
- 9.9. The Confluent Hypergeometric Function, 260.
- 9.10. The Differential Equation for the Confluent Hypergeometric Function and Its Solution. The Confluent Hypergeometric Function of the Second Kind, 262.
- 9.11. Integral Representations of the Confluent Hypergeometric Functions, 266.
- 9.12. Asymptotic Representations of the Confluent Hypergeometric Functions for Large |z|, 268.
- 9.13. Representation of Various Functions in Terms of the Confluent Hypergeometric Functions, 271.
- 9.14. Generalized Hypergeometric Functions, 275. Problems, 276.
- 10 PARABOLIC CYLINDER FUNCTIONS, Page 281.
 - 10.1. Separation of Variables in Laplace's Equation in Parabolic Coordinates, 281.
 - 10.2. Hermite Functions, 283.
 - 10.3. Some Relations Satisfied by the Hermite Functions, 287.
 - 10.4. Recurrence Relations for the Hermite Functions, 288.
 - 10.5. Integral Representations of the Hermite Functions, 290.
 - 10.6. Asymptotic Representations of the Hermite Functions for Large |z|, 291.
 - 10.7. The Dirichlet Problem for a Parabolic Cylinder, 293.
 - 10.8. Application to Quantum Mechanics, 297. Problems, 297.
 - BIBLIOGRAPHY, Page 300.
 - INDEX, Page 304.
