<b>Preface</b>	ix
<b>Part I. Electrodynamics as a Gauge Field Theory</b>	<b>1</b>
<b>1. General Gauge Field Theory Applied to Electrodynamics</b>	<b>3</b>
1.1 Elements of Vector Analysis in the Circular Basis ((1), (2), (3))	7
1.2 The Electromagnetic Field Tensor in O(3) Electrodynamics	14
1.3 Gauge Transformation in O(3) Electrodynamics	31
<b>2. The Geometry of Gauge Fields</b>	<b>63</b>
2.1 Application to Electromagnetic Theory with Internal Space ((1), (2), (3))	64
2.2 The Geometrical Meaning of O(3) Electrodynamics	75
2.3 The Field Equations of O(3) Electrodynamics	76
<b>3. Field-Matter Interaction</b>	<b>93</b>
3.1 Introduction	93
3.2 Classical Non-Relativistic Physics	95
3.3 Classical Relativistic Physics	98
3.4 Non-Relativistic Quantum Physics	99
3.5 Relativistic Quantum Physics	100
3.6 Raleigh-Schrödinger Perturbation Theory	101
3.7 Discussion	101

Part II. Historical Development of O(3) Electrodynamics:  
Selected Papers

111

1. Ultra Relativistic Inverse Faraday Effect	113
2. On the Use of a Complex Vector Potential in the Minimal Prescription in the Dirac Equation	125
3. Infinitesimal Field Generators	135
4. Note on Radio Frequency Induced N.M.R.	159
5. Fundamental Definitions for the Vacuum $\mathbf{B}^{(3)}$ Field	163
6. Unified Field Theory and $\mathbf{B}^{(3)}$	179
7. The Physical Meaning of $\mathbf{B}^{(3)}$	189
8. Relativistic Magneto-Optics and the Evans-Vigier Field	199
9. On the Irrotational Nature of the $\mathbf{B}^{(3)}$ Field	213
10. The Interaction of the Evans-Vigier Field with Atoms	225

11. The Derivation of the Majorana Form of Maxwell's Equations from the B Cyclic Theorem	235
12. The Evans-Vigier Field $\mathbf{B}^{(3)}$ Interpreted as a De Broglie Pilot Field	241
13. The Charge Quantization Condition: Link Between the O(3) Gauge Group and the Dirac Equation	255
14. The Evans-Vigier Field, $\mathbf{B}^{(3)}$ , in Dirac's Original Electron Theory: a New Theorem of Field-Fermion Interaction	263
15. The Microwave Optical Zeeman Effect Due to $\mathbf{B}^{(3)}$	277
16. $\mathbf{B}^{(3)}$ Echoes	285
17. Maxwell's Vacuum Field — a Rotating Charge	295
18. Dipole Model for the Photon and the Evans-Vigier Field	307
19. Electromagnetism in Curved Space-time	317
20. The Cyclic Structure of Vacuum Electromagnetism: Quantization and Derivation of Maxwell's Equations	323
