Preface	ix
1 Geometry of the k-Tangent Bundle $T^k M$	1
1.1 The Category of k -Accelerations Bundles	1
1.2 Liouville Vector Fields. k -Semisprays	4
1.3 Nonlinear Connections	8
1.4 The Dual Coefficients of a Nonlinear Connection	11
1.5 The Determination of a Nonlinear Connection	15
1.6 d -Tensor Fields. N -Linear Connections	18
1.7 Torsion and Curvature	22
2 Lagrange Spaces of Higher Order	27
2.1 Lagrangians of Order k	27
2.2 Variational Problem	29
2.3 Higher Order Energies	32
2.4 Jacobi-Ostrogradski Momenta	33
2.5 Higher Order Lagrange Spaces	34
2.6 Canonical Metrical N -Connections	37
2.7 Generalized Lagrange Spaces of Order k	39
3 Finsler Spaces of Order k	43
3.1 Spaces $F^{(k)n}$	43
3.2 Cartan Nonlinear Connection in $F^{(k)n}$	48
3.3 The Cartan Metrical N -Linear Connection	54
4 The Geometry of the Dual of k-Tangent Bundle	59
4.1 The Dual Bundle $(T^{*k}M, \pi^{*k}, M)$	59
4.2 Vertical Distributions. Liouville Vector Fields	62
4.3 The Structures J and J^*	65
4.4 Canonical Poisson Structures on $T^{*k}M$	69
4.5 Homogeneity	70
5 The Variational Problem for the Hamiltonians of Order k	77
5.1 The Hamilton-Jacobi Equations	77
5.2 Zermelo Conditions	82
5.3 Higher Order Energies. Conservation of Energy $\mathcal{E}^{k-1}(H)$	84
5.4 The Jacobi-Ostrogradski Momenta	85

5.5	Nöther Type Theorems	88
6	Dual Semispray. Nonlinear Connections	97
6.1	Dual Semispray	97
6.2	Nonlinear Connections	101
6.3	The Dual Coefficients of the Nonlinear Connection N	106
6.4	The Determination of the Nonlinear Connection by a Dual k -Semispray	112
6.5	Lie Brackets. Exterior Differential	113
6.6	The Almost Product Structure \mathbb{P} . The Almost Contact Structure \mathbb{F}	118
6.7	The Riemannian Structure \mathbb{G} on $T^{*k}M$	119
6.8	The Riemannian Almost Contact Structure (\mathbb{G}, \mathbb{F})	121
7	Linear Connections on the Manifold $T^{*k}M$	125
7.1	The Algebra of Distinguished Tensor Fields	125
7.2	N -Linear Connections	126
7.3	The Torsion and Curvature of an N -Linear Connection	130
7.4	The Coefficients of a N -Linear Connection	132
7.5	The h -, v_α - and w_k -Covariant Derivatives in Local Adapted Basis	134
7.6	Ricci Identities. Local Expressions of d -Tensor of Curvature and Torsion. Bianchi Identities.	138
7.7	Parallelism of the Vector Fields on the Manifold $T^{*k}M$	142
7.8	Structure Equations of a N -Linear Connection	147
8	Hamilton Spaces of Order $k \geq 1$	151
8.1	The Spaces $H^{(k)n}$	151
8.2	The k -Tangent Structure J and the Adjoint k -Tangent Structure J^*	154
8.3	The Canonical Poisson Structure of the Hamilton Space $H^{(k)n}$	157
8.4	Legendre Mapping Determined by a Lagrange Space $L^{(k)n} = (M, L)$	159
8.5	Legendre Mapping Determined by a Hamilton Space of Order k	163
8.6	The Canonical Nonlinear Connection of the Space $H^{(k)n}$	165
8.7	Canonical Metrical N -Linear Connection of the Space $H^{(k)n}$	167
8.8	The Hamilton Space $H^{(k)n}$ of Electrodynamics	171
8.9	The Riemannian Almost Contact Structure Determined by the Hamilton Space $H^{(k)n}$	174
9	Subspaces in Hamilton Spaces of Order k	177
9.1	Submanifolds $T^{*k}M$ in the Manifold $T^{*k}M$	177
9.2	Hamilton Subspaces $\overset{\vee}{H}^{(k)n}$ in $H^{(k)n}$. Darboux Frames	181
9.3	Induced Nonlinear Connection	183
9.4	The Relative Covariant Derivative	186
9.5	The Gauss-Weingarten Formula	193
9.6	The Gauss-Codazzi Equations	195

10	The Cartan Spaces of Order k as Dual of Finsler Spaces of Order k	199
10.1	$\mathcal{C}^{(k)n}$ -Spaces	199
10.2	Geometrical Properties of the Cartan Spaces of Order k	201
10.3	Canonical Presymplectic Structures, Variational Problem of the Space $\mathcal{C}^{(k)n}$	203
10.4	The Cartan Spaces $\mathcal{C}^{(k)n}$ as Dual of Finsler Spaces $F^{(k)n}$	205
10.5	Canonical Nonlinear Connection. N -Linear Connections	209
10.6	Parallelism of Vector Fields in Cartan Space $\mathcal{C}^{(k)n}$	213
10.7	Structure Equations of Metrical Canonical N -Connection	216
10.8	Riemannian Almost Contact Structure of the Space $\mathcal{C}^{(k)n}$	218
11	Generalized Hamilton and Cartan Spaces of Order k. Applications to Hamiltonian Relativistic Optics	221
11.1	The Space $GH^{(k)n}$	221
11.2	Metrical N -Linear Connections	223
11.3	Hamiltonian Relativistic Optics	227
11.4	The Metrical Almost Contact Structure of the Space $GH^{(k)n}$	230
11.5	Generalized Cartan Space of Order k	232
	References	235
