

Abstract Contents

<i>First author</i>	<i>Title</i>	<i>Page</i>
LI Jiangang	Research Activities towards Testing Reactor	17
FUJIWARA Masami	Overview of Fusion Research in Japan	18
PAN C.H.	Status of the Fusion Research Activities at SWIP	19
SZE Dai-Kai	Recent Progress in APEX Study	21
MATSUDA Shinzaburo	Japanese Contribution to the ITER Engineering Design Activities and Preparation for the ITER Construction Phase	22
GE Changchun	Research on SiC/C Plasma-Facing Functionally Graded Materials (FGM) in China	23
YAMAWAKI M.	Advanced Nuclear Fuel Development IN Japan	25
VICTORIA M.	The Mechanical Properties of He Containing Fusion Materials	26
ZHANG C.H.	A study of helium behavior in some candidate materials for fusion reactors	27
FAULKNER R.G.	Non-Hardening Embrittlement of Reactor Pressure Vessel Steels	28
ABE Hiroaki	In-situ TEM Observations of Defect Cluster Diffusion in Copper under Irradiations with C ⁺ and Cu ⁺ Ions	29
ABE K.	Development of Modified V-Cr-Ti Type Alloys for Fusion Application	30
ARAKI H.	Studies on the Space Homogeneity and Flexural Strength of Several SiC Fibers-Reinforced CVI-SiC Matrix Composites	31
CHEN J.L.	Development of Candidate Plasma Facing Materials for Steady State Operation of the HT-7U Superconducting Tokamak	32
CHEN Jiming	Hydrogen Embrittlement of a V4Cr4Ti Alloy	33
CHEN Yuan	Leakage Rate of Combined Hemispherical Shells with D-T Neutrons	34
DAI Yong	Mechanical properties and microstructure in martensitic steels 9Cr-1Mo and F82H irradiated up to 12 dpa and 1100 appm He in a proton and neutron mixed spectrum	35
FENG K.M.	Activation Calculations for a Fusion Engineering Breeder Experimental Outline Design, FEB-E	37
FENG Mingquan	Research on Irradiation Effects of Nuclear Fuel and Materials in HFETR	38
HE K.H.	Conceptual Design of ST-based Tritium Production Fusion Reactor	39
HINO T.	Plasma Surface Interaction Studies on Low Activation Materials	40
HOU Mingdong	A Study on Surface Topography of Amorphous Alloys Irradiated with Helium Ions	41
HU Benfu	Effect of Helium on the Irradiation Damage Behaviour in HAZ of Low Activation Fe-Cr-Mn(W,V) Alloy with Higher Performance	42
HU Gang	Flow Analyses of Liquid Metal first wall	43

HUANG J. H.	High Power Density Blanket Design Study for Fusion Reactors	44
HUANG Qunying	Analysis of the Radiation Shield of HT-7U Tokamak	45
HUO Xiaodong	Study on the Utilization of Spent PWR Fuel - Advanced Nuclear Fuel Cycle of PWR/CANDU Synergism	46
JIN Yunfan	Irradiation Effect of HT-9 Steel Induced by 510 MeV Carbon Ions	47
KANG Yi	In-reactor Tritium Release Behavior from Molten Li-Sn Alloy as a Liquid Metal Breeder	48
KE Y.	High Power Density Effects on the Key Component Design in Dual-cooled Transmutation Blanket for the FDS	49
KIMURA A.	Thermal Helium Desorption Behavior in Reduced Activation Ferritic Steels and Advanced ODS Steels	50
KOHYAMA AKIRA	Advances in Silicon Carbide Composite Materials Research and Engineering Applications	51
KODAMA H.	Study on Retention and Chemical States of Implanted Deuterium into Boron Thin Film	52
KONDOU K.	Study on IASCC of SUS304 Stainless Steel Using Light Ion Irradiation	53
LIU J.	Graphite Surface Damage Induced by Swift Heavy Ions	54
LI Meimei	Performance of Copper Alloys for High Heat Flux Applications in Fusion Systems	55
LIU X.	Microstructure changes of plasma spraying tungsten coatings on CFC after different temperature annealing	56
LIU Xiaoping	Development & Application of MCNP Auto-Modeling Tool : MCAM 2.0	57
LU Fei	Damage Profile in LiNbO ₃ by Low Energy H ⁺ Implantation	58
MATSUYAMA M.	Nondestructive Measuring Technique of Tritium Retained on/in Plasma-Facing Materials	59
MURASE Y.	Laser Confocal Microscope Measurement of the In-Beam Fatigue Fracture Surface for F82H Steel	60
NAGASAKA T.	Improvement of low-activation property by impurity reduction from Japanese and Chinese V-4Cr-4Ti alloys for fusion reactor	61
NARUI M.	Fission Reactor Irradiation Tests of Bolometer	62
NISHIKAWA Masabumi	Tritium Decontamination from various Materials	63
NISHIMURA Arata	Safety Design of Support Structure and Requirements for Cryogenic Structural Materials in Fusion Magnet System	64
NODA N.	Plasma Facing Materials in LHD and Collaboration Activities with China	65
NODA T.	Formation and annihilation of ²⁶ Al in SiC composites in Fusion Neutron Environment	66
OHNUKI S.	Improvement of Mechanical Property and Microstructure by Addition of IVa and Va Elements in Neutron-Irradiated 316 Stainless Steel	67

OYA Y.	Hydrogen behavior on the surface of SUS304 and Fe for cooling pipe	68
QIAN J. P.	Nuclear Power R&D Strategy and Fusion Engineering Research in China	69
SAGARA Akio	Design Studies on Flibe Blanket System in Helical Reactor FFHR	70
SHIBAYAMA Tamaki	Effects of applied stress on microstructural evolution in highly crystalline SiC fiber	71
SUN Youmei	The Damage process induced by Swift heavy ion in polycarbonate	72
SZENES G.	Amorphization in Ceramic Materials under Fission Fragment Bombardment	73
TAKAHASHI H.	Behaviors of Cascade Damage Structure under Electron Irradiation and Annealing	74
TANG Z.	Cu Precipitates in Dilute Fe-Cu Alloys: Formation Dynamics and Electronic Structure	75
TANAKA Satoru	Quantum Chemical Calculation on the Interaction of Hydrogen Isotopes with Materials for Energy System	76
TEGA Eriko	Basic Study on Tritium Monitoring Using Gas Separation Membrane	77
UENO Keiko	Effect of Dislocation Density on the Irradiation Creep of SUS 316L	78
WAN Farong	Phase Transformation of TiNi Shape Memory Alloy under Electron Irradiation	79
WANG H.Y.	Analysis of MHD Pressure Drop in the Packed Pebble Bed-based Blanket for the FDS	80
WANG Z. G.	MeV C-ion induced Grain Boundary Crack at 316L SS Surface	81
WU Bin	Tokamak Physics Design in the Fusion Driven Sub-critical System	82
WU Y. C.	Studies on Multifunctional Blanket in the Fusion-Driven Sub-critical System	83
XIAO B. J.	Thermal Performance of TF Coils in HT-7U in the Case of Plasma Disruption	84
XIE Erqing	The study on the electrical property of the ion-implanted polystyrene films	85
XU Zengyu	A Theoretical Analysis of Liquid Metal Jet Flow Magneto-hydrodynamic Stabilities in a Non-uniform Magnetic Field	86
YAMAMOTO N.	Creep Response of a Reduced Activation Martensitic Steel 9Cr3WVTaB against Hot Helium Implantation	87
YANG W.	Interfacial Shear Strength and Its Effects on the Mechanical Properties of Hi-Nicalon/CVI-SiC Matrix Composites	88
YANG Yunmin	Evolution of small dislocation loop during deformation	89
YOSHIDA N.	Effects of Helium Plasma on Material Properties and PWI	90
ZHANG Fu	Thermal Fatigue Study of W/Cu Alloy Joint	91
ZHU Shengyun	Dependence of Radiation Damage in stainless Steel on Irradiation Temperature and Dose	92
ZU X. T.	Influence of Electron Irradiation on the Martensitic Transformation of a Binary TiNi Shape Memory Alloy	93
