

## Program

Tuesday 7<sup>th</sup> December

	Title	Page
<b>KEYNOTE LECTURES</b>		
<b>KN-1</b>	O. Motojima New Status of ITER Project	25
<b>KN-2</b>	A. Komori Prospects of fusion researches in National Institute for Fusion Science towards the next two decades	26
<b>PLENARY/INVITED SESSION</b>		
<b>PL-1</b>	T. Sato New Horizons of Simulation Science: Problem-Posing Simulation	27
<b>I-1</b>	H. J. Lee Recent progress and future outlook of the kinetic and fluid simulations for low temperature plasmas	28
<b>INVITED/ORAL SESSION</b>		
<b>I-2</b>	J. Decker Fast electrons physics in tokamak plasmas	29
<b>O-1</b>	T. Matsui MPI parallelization of full PIC simulation code with Adaptive Mesh Refinement	30
<b>O-2</b>	S. Ikuno High Performance Iterative Solver for Linear System using Multi GPU	31
<b>INVITED/ORAL SESSION</b>		
<b>I-3</b>	H. Xia Shear Suppression of Turbulence in Plasma and Fluids: 20 years after	32
<b>O-3</b>	M. Rajkovic Multiscale phenomena, pattern formation and transport in magnetically confined plasma turbulence	33
<b>O-4</b>	A. V. Melnikov Supra thermal electron induced electrostatic eigenmodes with radially localized structure in TJ-II	34

	Title	Page
<b>O-5</b>	A. Shimizu Potential profile measurement with heavy ion beam probe in the Large Helical Device	35

## POSTER SESSION 1

**Wednesday 8<sup>th</sup> December**

		<b>Title</b>	<b>Page</b>
<b>PLENARY/INVITED/ORAL SESSION</b>			
<b>PL-2</b>	W. M. Tang	Scientific and Computational Challenges of the Fusion Simulation Program (FSP)	135
<b>I-4</b>	F. Zonca	Recent progress and future prospects in energetic particle physics in toroidal plasmas	136
<b>I-5</b>	N. Hayashi	Integrated modeling of whole tokamak plasma	137
<b>O-6</b>	S. Murakami	Simulation Study of ICRF heating in the LHD by TASK/WM+GNET	138
<b>INVITED/ORAL SESSION</b>			
<b>I-6</b>	M. Barnes	Shear flow suppression of turbulent transport and self-consistent evolution of mean plasma profiles	139
<b>O-7</b>	J. Li	Multi-scale turbulence interaction through cross-scale dynamo generation by micro-scale turbulent flow in plasmas	140
<b>O-8</b>	M. Nunami	Gyrokinetic simulation of ion temperature gradient turbulence and zonal flows in Large Helical Device experiments	141
<b>O-9</b>	S. R. Hudson	Multi-volume, partially-relaxed MHD equilibria	142
<b>INVITED/ORAL SESSION</b>			
<b>I-7</b>	K. Mima	Laser Fusion Research at Institute of Laser Engineering, Osaka University	143
<b>O-10</b>	A. Iwamoto	Mechanical issues of FIREX target under cryogenic environment	144
<b>O-11</b>	Y. Kajimura	Numerical study for laser source protection from Alpha particles by magnetic fields in a Laser Fusion Reactor	145

		<b>Title</b>	<b>Page</b>
<b>INVITED/ORAL SESSION</b>			
<b>I-8</b>	D. E. Hinkel	Stimulated Raman scatter analyses of experiments conducted at the National Ignition Facility	146
<b>O-12</b>	H. Nagatomo	Target Design for Fast Ignition by using the Sophisticated Computational Simulations	147
<b>O-13</b>	C. Zheng	Simulations of ion acceleration and nonlinear instabilities in fusion plasmas	148
<b>POSTER SESSION 2</b>			

**Thursday 9<sup>th</sup> December**

	Title	Page
<b>PLENARY/INVITED/ORAL SESSION</b>		
<b>PL-3</b>	S. C. Prager Magnetic confinement from 1990 to 2030	253
<b>I-9</b>	M. Mori Recent Progress and Future Prospects on the JT-60SA Project	254
<b>I-10</b>	B. Wan Recent RF heating and current drive experiments on EAST	255
<b>O-14</b>	J. Kim Robust plasma start-up in the KSTAR with compensating ferromagnetic incoloy effect	256
<b>INVITED/ORAL SESSION</b>		
<b>I-11</b>	S. C. Chapman Universal features of plasma turbulence in finite sized systems – some clues from the solar wind	257
<b>I-12</b>	C. Z. Cheng Explosive Global Scale Energy Release Phenomena in Space Plasmas	258
<b>O-15</b>	H. Hasegawa Response of magnetosphere to microscopic effects in auroral arcs formation	259
<b>O-16</b>	H. Jin Space weather simulation by a whole atmosphere-ionosphere coupled model	260
<b>O-17</b>	S. G. Moiseenko Simulation of magnetorotational processes in core collapse supernovae	261

**Friday 10<sup>th</sup> December**

	Title	Page
<b>PLENARY/INVITED/ORAL SESSION</b>		
<b>PL-4</b>	N. C. Luhmann, Jr. Recent progress on microwave imaging technology and new physics results	263
<b>I-13</b>	A. Kageyama Tracer Line Visualization of MHD Simulation Data with Virtual Reality	264
<b>I-14</b>	K. W. Hill Recent Advances and Future Prospects for X-Ray Spectroscopic Imaging In Fusion Research	265
<b>O-18</b>	H. Ohtani Simultaneous Visualization of Simulation Results and Experimental Devices in Virtual-Reality Space	266
<b>INVITED/ORAL SESSION</b>		
<b>I-15</b>	P. K. Shukla Dusty Plasma Physics: Frontier of Interdisciplinary Science	267
<b>O-19</b>	M. Toida Simulation studies of multidimensional effects on electron acceleration in magnetosonic shock waves	268
<b>O-20</b>	R. S. Rawat Repetitive miniature plasma focus device: Development, issues and applications	269
<b>O-21</b>	M. Wada Development of a 14 GHz microwave H <sup>-</sup> source	270
<b>INVITED/ORAL SESSION</b>		
<b>I-16</b>	J. W. Van Dam New Concept for a Fusion-Fission Hybrid System	271
<b>O-22</b>	H. Utoh Blanket concept of water-cooled lithium lead with beryllium for the SlimCS fusion DEMO reactor	272
<b>O-23</b>	T. Goto A Robust Design Window for the Heliotron DEMO Reactors	273
	R. Horiuchi Simulation Science at the National Institute for Fusion Science (NIFS)	274

**Tuesday 7<sup>th</sup> December – Poster Session 1**

No.	Author	Title	Page
P1-1	S. Fujiwara	Molecular dynamics simulation of micellar shape change in amphiphilic solution	37
P1-2	R. Shirasaki	Dissipative particle dynamics simulation of phase behavior in bolaamphiphilic solution	38
P1-3	H. Naitou	HPC parallel programming model for gyrokinetic MHD simulation	39
P1-4	T. Kawano	Numerical method for Eulerian gyro-kinetic Vlasov simulation based on the multi-moment scheme	40
P1-5	S. Maeyama	Numerical methods for parallel particle motions in gyrokinetic Vlasov simulation	41
P1-6	K. Fukazawa	Performance measurement of MHD codes for space plasma on a large number of cores on two scalar type supercomputer systems	42
P1-7	J. Suzuki	Acceleration of PIC simulation with GPU	43
P1-8	R. Ueda	Effectiveness of GPGPU for Magnetohydrodynamics Code using CIP-MOCCT method	44
P1-9	A. Saitoh	New Implementation Method for Essential Boundary Condition to Extended Element-Free Galerkin Method: Application to Nonlinear Problem	45
P1-10	A. Kamitani	Extension of Meshless Galerkin/Petrov-Galerkin Approach without Using Lagrange Multipliers	46
P1-11	T. Itoh	Efficient Evaluation of Influence Coefficients in Three-Dimensional Extended Boundary-Node Method for Potential Problems	47
P1-12	K. Araki	Orthonormal Divergence-free Wavelet Analysis of Inverse Transfer of Magnetic Energy by the Hall Term	48
P1-13	A. Sugahara	Remote collaboration system based on the monitoring of large scale simulation	49
P1-14	Y. Nagayama	Development of Microwave Imaging Reflectometry in LHD	50
P1-15	D. Kuwahara	Development of ECE Imaging Diagnostic system on LHD	51

No.	Author	Title	Page
P1-16	T. Yoshinaga	Development of Microwave Imaging Diagnostics System in LHD	52
P1-17	B. J. Peterson	Improving spatial resolution of imaging bolometers on LHD	53
P1-18	A. Sanpei	Development of SXR imaging system for three-dimensional structural studies in toroidal plasmas	54
P1-19	T. Ming	Tomographic reconstructions for the two-dimensional imaging diagnostics	55
P1-20	R. Sano	Thermal characteristics of foils for an imaging bolometer	56
P1-21	C. J. Xiao	Satellite observation of plasma waves near x-line during magnetic reconnection	57
P1-22	S. Nozaki	Fast and Robust Reconstruction of Penumbral Images by Combining Multiple Wiener Filters	58
P1-23	D. Matsuoka	Illustrative Deformation and Visualization for Space Plasma Simulation via Virtual Reality System	59
P1-24	T. Umetani	Automated Pose Estimation of Objects using Multiple ID Devices for Handling and Maintenance Task in Nuclear Fusion Reactor	60
P1-25	K. Ukita	Design Support System in an Immersive Projection Display with haptic feedback	61
P1-26	Y. Takabatake	Position measurement system using feature points for indoor structures	62
P1-27	H. Maruo	Smoothing method of shape measurement for low-cost 3D-scanner	63
P1-28	H. Sugama	Momentum balance and radial electric fields in axisymmetric and nonaxisymmetric systems	64
P1-29	S. Nishimura	An application of generalized Taguchi's formulation of neoclassical transport as a validation of the traditional moment equation approach	65
P1-30	V. S. Mikhailenko	Non-modal approach to kinetic theory of plasma shear flows	66
P1-31	N. Kasuya	Turbulence Diagnostic Simulator - development of numerical tools for turbulence analyses in helical plasmas	67

<b>No.</b>	<b>Author</b>	<b>Title</b>	<b>Page</b>	<b>No.</b>	<b>Author</b>	<b>Title</b>	<b>Page</b>
P1-32	H. Seto	Self-consistent formulation of two-dimensional transport in tokamak plasmas	68	P1-48	M. Yokoyama	Toroidal flow analysis in LHD based on neoclassical theory towards its implementation into the integrated transport code, TASK3D	84
P1-33	S. Satake	Neoclassical viscosity calculation in non-axisymmetric configurations using delta-f Monte Carlo method	69	P1-49	Y. Kosuga	Efficiency of Intrinsic Rotation Generation in Tokamaks	85
P1-34	S. Matsuoka	Neoclassical Transport Calculation for High Electron Temperature Plasmas in LHD by delta f Monte Carlo Method	70	P1-50	Y. Moriya	Simulation study of ECCD in helical plasmas	86
P1-35	S. Izumi	Study of radial diffusion of energetic ions by high-m magnetic perturbations by GNET code	71	P1-51	M. Sasaki	Characteristics of bulk ion heating by geodesic acoustic modes	87
P1-36	T. Shirakawa	Simulation study of ICRF heating in the HSX plasma by GNET	72	P1-52	M. Nakamura	One-Dimensional Time Dependent Analysis of the Detachment front in a Divertor Plasma	88
P1-37	R. Kanno	Monte-Carlo Simulation Code Solving Fluid Equations of Radial Transport in Toroidal Plasma	73	P1-53	Y. Masaoka	Density dependence of alpha particle confinement in heliotron reactor	89
P1-38	S. Toda	Theoretical Study of Radial Electric Field Dynamics in Helical Plasmas	74	P1-54	H. Matsuura	Neutral particle transport simulation around the V-shaped target with DEGAS2 code	90
P1-39	Y. Hori	Internal transport barrier analysis including impurities in tokamak and helical reactor plasmas	75	P1-55	M. Shoji	Simulation analysis of the design of a vacuum pumping system for the closed helical divertor in the Large Helical Device	91
P1-40	S. Jolliet	Implementation of multiple species in the GT5D code	76	P1-56	O. A. Shyshkin	Ignition Analysis for D Plasma with non-Maxwellian <sup>3</sup> He Minority in Heliotron Reactor	92
P1-41	T.-H. Watanabe	Gyrokinetic simulation of ITG modes in helical plasmas with equilibrium-scale radial electric field	77	P1-57	M. Bando	Modeling of impurity release, transport and deposition on plasma facing components in ITER	93
P1-42	S. Miyata	Gyrofluid simulation of slab ITG turbulence in plasmas including pressure profile corrugation	78	P1-58	T. Oishi	Simulation of the fuel isotope effect on the confinement property in DT fusion reactors	94
P1-43	P. P. Hilscher	A new gyrokinetic Vlasov code on high performance architectures towards multi-scale turbulence simulation in magnetic fusion plasma	79	P1-59	V. S. Voitsenya	The present state of investigations on stellarators in Kharkov	95
P1-44	A. Ishizawa	Ion dynamics in electron temperature gradient turbulence	80	P1-60	A. A. Beletskii	Studies of anomalous transport in the edge plasma of the Uragan-3M torsatron	96
P1-45	S. Nishimura	Influence of Magnetic Island Chains on Resistive Ballooning Turbulence	81	P1-61	S. W. Yoon	The effect of supra-thermal electrons on low density Ohmic discharges in KSTAR	97
P1-46	M. Sato	Extension of an integrated simulation code TASK3D for applying to two-ion plasmas	82	P1-62	Y. Nagashima	Evaluation of edge electron temperature fluctuation by the use of fast voltage scanning method on TST-2	98
P1-47	A. Wakasa	Heat transport simulation with the differential equation for the radial electric field by TASK3D	83	P1-63	K. Baba	Confinement of ECH plasmas and effect of outboard helical magnetic field in TOKASTAR-2	99
				P1-64	M. Hasegawa	Experiments of plasma current start-up in tokamak-helical hybrid device TOKASTAR-2	100

No.	Author	Title	Page
P1-65	H. Funaba	Dependence of Local Transport on Magnetic Configurations in Reactor-Relevant High-Beta LHD Plasmas	101
P1-66	R. Seki	Transport Study of LHD high-beta plasmas based on Power balance Analysis with TASK3D code modules	102
P1-67	T. Mizuuchi	Recent Progress on Plasma Control Studies to Improve Plasma Performance in Heliotron J	103
P1-68	H. Okada	Numerical Analysis of ICRF Minority Heating in Heliotron J	104
P1-69	K. Mukai	Density modulation experiment in Heliotron J	105
P1-70	S. Ohshima	Edge Turbulence Study using Multiple Langmuir Probe System in Heliotron J	106
P1-71	N. Nishino	3-D filament structure measurement in Heliotron J	107
P1-72	M. Takeuchi	Measurements of edge fluctuations by using fast cameras and a hybrid probe in Heliotron J	108
P1-73	Z. Gao	Radial electric field generated by the low hybrid wave injection in a tokamak plasma	109
P1-74	R. Ogata	Investigation of statistical characterization and measurement of radial propagation of blob-like structure in ECRH plasma on QUEST	110
P1-75	K. Kawashima	Evaluation of Electron Temperature Fluctuations Using Two Different Probe Techniques in Plasma Assembly for Nonlinear Turbulence Analysis (PANTA)	111
P1-76	T. Murakami	Measurement of the temporal evolution of plasma flows in the peripheral region of the GAMMA10 central cell	112
P1-77	P. Drewelow	Divertor heat flux measurements at LHD	113
P1-78	A. Murakami	Observation of electron-temperature fluctuations triggered by a supersonic gas puffing in LHD	114
P1-79	S. Kubo	Effect of High Energy Electrons on Electron Cyclotron Resonance Heating in the LHD	115
P1-80	Y. Yoshimura	Dependence of EC-driven current on the direction of EC-wave beam in LHD	116

No.	Author	Title	Page
P1-81	N. K. Kharchev	Recent ECRH experiments in the L-2M stellarator with the use of a new high-power gyrotron	117
P1-82	K. Uchijima	Wave Characteristics of Electron Cyclotron Range of Frequencies at the Overdense Plasma on the Internal Coil Device Mini-RT	118
P1-83	T. Seki	ICRF experiment using HAS antenna and its numerical analysis in LHD	119
P1-84	M. Isobe	Experimental check of deceleration of neutral beam-injected energetic ions in the HL-2A tokamak	120
P1-85	T. Kobayashi	Observation of Nonlinear Coupling between Low Frequency Coherent Modes and Background Turbulence in LMD-U	121
P1-86	M. Den	Modeling of magnetic reconnection in the magnetotail using global MHD simulation with kinematic effects	122
P1-87	S. Inoue	Three-dimensional Magnetic Structure of the Solar Active Region NOAA 10930	123
P1-88	S. Kumar	Kinetic Alfvén wave excitation by magnetosonic wave in high beta plasmas.	124
P1-89	T. Torada	Time-dependent Characteristics of recombining Plasma with Pulse Plasma Flow	125
P1-90	K. Fujii	A Collisional-Radiative Model for Hydrogen Including Velocity Changing Collisions between Excited Atoms and Protons	126
P1-91	A. Sasaki	Modeling of atomic processes of multiple charge ions in plasmas and its application to the study of XUV light sources	127
P1-92	S. Oikawa	Numerical Analysis of Quantum-Mechanical Grad-B Drift	128
P1-93	T. Shimazaki	Numerical Analysis of Quantum-Mechanical ExB Drift	129
P1-94	K. Ogura	Experimental study on backward wave oscillation based on cylindrical surface wave	130
P1-95	K. Kozue	Two-dimensional spatial temperature and density measurements in an arcjet plasma expanding through a slit nozzle	131

No.	Author	Title	Page
P1-96	T. Matsuoka	Scaling Laws of Lissajous Acceleration for Electrodeless Helicon Plasma Thruster	132
P1-97	Y.-D. Jung	Nonthermal and plasma screening effects on the Thomson scattering in generalized Lorentzian plasmas	133
P1-98	T. Kenmotsu	Agglomeration process of carbon dusts in hydrocarbon plasma	134

### Wednesday 8<sup>th</sup> December – Poster Session 2

No.	Author	Title	Page
P2-1	A. Bierwage	Nonlinear hybrid simulations of energetic particle modes in realistic tokamak flux-surface geometry	149
P2-2	Y. Todo	Nonlinear hybrid simulation of Alfvén eigenmode bursts	150
P2-3	H. Wang	Simulation study of Alfvén eigenmodes in reversed shear plasmas	151
P2-4	M. Hirota	Weakly nonlinear analysis of Alfvén eigenmodes	152
P2-5	T. Miyoshi	A comparative study of divergence cleaning techniques for multi-dimensional MHD schemes	153
P2-6	Y. Asahi	MHD equilibrium analysis with anisotropic pressure in LHD	154
P2-7	A. Ito	Equilibria with flow and pressure anisotropy in high-beta reduced MHD models	155
P2-8	D. Raburn	Numerical calculation of equilibria with poloidal-sonic flow and finite Larmor radius effects in a reduced two-fluid model	156
P2-9	K. Saito	Effect of parallel diffusion of equilibrium pressure on interaction between interchange mode and static magnetic island	157
P2-10	M. Bunno	Three-dimensional MHD equilibria of ITER plasmas	158
P2-11	I. Katanuma	The Stability of Interchange Modes in the GAMMA10 A-divertor	159
P2-12	K. Yagi	Stability analysis on tandem mirror with magnetic divertor	160
P2-13	M. Furukawa	Improved numerical matching technique for MHD stability analysis	161
P2-14	T. Sugiura	Ballooning mode stability analysis of a toroidally rotating plasma in magnetospheric configuration	162
P2-15	K. Ichiguchi	Multi-Scale MHD Simulation of LHD Plasma Including Continuous Heating and Background Pressure Diffusion	163
P2-16	N. Mizuguchi	Nonlinear analysis of MHD collapse phenomena in the core region of helical system	164
P2-17	R. Ishizaki	MHD simulation on pellet plasmoid in tokamak and LHD plasmas	165

No.	Author	Title	Page
P2-18	A. Matsuyama	Plasma shielding model for the ablation of hydrogen pellets with fast ions in Large Helical Device	166
P2-19	I. Murakami	Effect of radiation power loss due to impurity gas puff in diverter plasma	167
P2-20	S. Okamura	Comparative study of magnetic field configurations of LHD and CHS based on the boundary shape analysis	168
P2-21	X. B. Ding	Ab-initio MCDF approach for the analysis of visible $W^{26+}$ M1 transitions	169
P2-22	G. Kawamura	Monte Carlo simulation of tungsten erosion by gas puffing to the LHD divertor plasma	170
P2-23	A. M. Ito	Fragile Region of Highly Oriented Pyrolytic Graphite in Chemical Erosion Process by Molecular Dynamics	171
P2-24	V. I. Maslov	Transformation Ratio at Neutral Beam Interaction with Plasma	172
P2-25	M. S. Vesnovskaya	Optimal Plasma Lens for Diagnostic Ion Beam Focusing	173
P2-26	K. Kawahata	Broadband Multichannel Radiometer for ECE Measurements on KSTAR	174
P2-27	W. Lee	Microwave Imaging Reflectometry System for KSTAR	175
P2-28	S. Sajjad	Observation of Zeeman Splitting of Spectral Lines and Impurities in KSTAR Plasma	176
P2-29	D. Seo	Design of the Infrared TV system for KSTAR	177
P2-30	J. H. Lee	Commissioning of KSTAR Thomson Scattering Diagnostic System	178
P2-31	W. H. Ko	Analysis of the active charge exchange emission by using NBI modulation and background method	179
P2-32	M. Hasuo	$Fe^{14+}$ and $Fe^{15+}$ spatial distributions in LHD plasma observed with a multiple-viewing-chord extreme-ultraviolet spectrometer	180
P2-33	S. Kamio	Multipoint spectroscopy measurement of spherical tokamak heating by magnetic reconnection in UTST	181

No.	Author	Title	Page
P2-34	M. W. Shafer	Soft x-ray imaging and inversion techniques for measurements of edge magnetic topology in the DIII-D tokamak	182
P2-35	M. Nishiura	Development of Collective Thomson Scattering diagnostic for bulk and fast ions in the Large Helical Device	183
P2-36	T. Tokuzawa	Developments of terahertz wave diagnostics for high-temperature and high-density plasma experiments	184
P2-37	H. Tsuchiya	Design and Install of New Electron Cyclotron Emission Diagnostic Antenna in LHD	185
P2-38	Y. Nomura	Design Consideration on Compact Neutron Pinhole Camera with Nuclear Emulsion for Energetic-ion Profile Diagnostics	186
P2-39	R. Imazawa	Thermal and Optical Analyses of Terrace Retro-reflector Array for Poloidal Polarimeter on ITER	187
P2-40	C. F. Dong	Survey of EUV impurity line spectra and EUV bremsstrahlung continuum in LHD	188
P2-41	R. Ikezoe	Measurement of spatiotemporal behavior of Alfvén-ion-cyclotron waves in the GAMMA10 tandem mirror	189
P2-42	Y. Imai	Observation of the pitch angle distribution of high-energy ions and their radial transport in the central cell of GAMMA10	190
P2-43	N. Ashikawa	Characterization of ion cyclotron wall conditioning using material probes in LHD	191
P2-44	Y. Takemura	Characteristics of Low-n MHD Instabilities in Helical Plasmas	192
P2-45	C. Suzuki	Analysis of magnetic axis shift for high beta and high density LHD plasmas using a soft X-ray CCD camera	193
P2-46	Y. Suzuki	Identification of Island Dynamics using Magnetic Diagnostics	194
P2-47	Y. Sato	Effects of Magnetic Islands on Poloidal Flow in TU-Heliac	195

No.	Author	Title	Page
P2-48	S. Yamamoto	Studies of magnetic island by optimized magnetic measurement in helical plasmas	196
P2-49	T. Asai	Time evolution of a magnetic structure of the field-reversed configuration in a super-Alfvénic translation process	197
P2-50	S. Ohdachi	Spatial structure of the bursting magnetic fluctuations of ELM activities observed in HL-2A tokamak	198
P2-51	T. Ide	Collisionless shock wave generation in counter-streaming plasmas using Gekko XII HIPER laser	199
P2-52	K. Seto	Theoretical study of ultra-relativistic laser electron interaction in the strong radiation reaction regime	200
P2-53	D. Kang	Assisted Ignition Target - Design in Central Ignition Inertial Confinement Fusion	201
P2-54	X. Li	Applications of X-ray Energy Balance in Hohlraums	202
P2-55	P. Zhang	Thermophysical properties of liquid molecules under high-energy-density conditions: A view from quantum molecular dynamics	203
P2-56	A. Singh	Guiding of a laser beam in collisionless magnetoplasma channel	204
P2-57	Z. Zhao	Subwavelength nanobrush target to accelerate and guide fast electrons simultaneously	205
P2-58	Y. Wu	Experimental study on Laser wakefield electron acceleration at LFRC	206
P2-59	N. Iwata	Analysis of relativistic ponderomotive force and higher-order particle motion in a non-uniform laser field using the noncanonical Lie perturbation method	207
P2-60	H. Chikaraishi	Conceptual Design of Power System of Helical type Fusion Reactor (FFHR)	208
P2-61	S. Masuzaki	Initial estimation of the divertor heat load in the heliotron-type reactor FFHR based on the LHD experiments	209
P2-62	H. Matsuura	Alpha-particle slowing-down characteristics and its effect on MHD instability excitation in high-density operation point in FFHR	210

No.	Author	Title	Page
P2-63	J. Miyazawa	Extrapolation of radial profile data to the fusion reactor condition based on the gyro-Bohm model	211
P2-64	H. Tamura	Methodology of mechanical behavior analysis of a helical coil for the LHD-type fusion magnet	212
P2-65	N. Yanagi	Reduced tritium circulation in the heliotron reactor by enhancing fusion reactivity	213
P2-66	T. Watanabe	DT fusion ignition of the LHD type helical reactor by Joule heating associated with the magnetic axis position shift	214
P2-67	S. Ito	Feasibility of a remountable high-temperature superconducting magnet for a helical fusion reactor	215
P2-68	S. Hamaguchi	Dynamic behavior of helium subcooling system for the LHD helical coils	216
P2-69	X. L. Liu	Study of a Matrix Converter for Plasma Vertical Position Control on QUEST Tokamak	217
P2-70	Y. Someya	Comparison of coolant conditions in the blanket for a water-cooled DEMO reactor SlimCS	218
P2-71	Y. Miyoshi	Automatic Optimization of Poloidal Field Coil System by Using Integrated Design Code of Tokamak Fusion Reactors	219
P2-72	T. Habuchi	Force Balance and Stability of Toroidally Helical Coil with Circular Cross Section	220
P2-73	K. Natsume	Evaluation of cryogenic oscillating heat pipe as a new device for indirect/conduction cooled superconducting magnets	221
P2-74	K. Takahata	Hysteresis loss in poloidal coils of the Large Helical Device	222
P2-75	T. Takayama	Numerical Investigation on Accuracy Improvement of Permanent Magnet Method for Measuring $j_C$ in High-Temperature Superconducting Film	223
P2-76	D. Kato	First-principle calculation of hydrogen interaction with dissolved carbon atom in tungsten lattice	224
P2-77	Y. Miyake	Molecular dynamics study of plasma wall interactions of W and C containing Be impurity	225
P2-78	H. Kawazome	Redeposition characteristics of heavy hydrocarbon molecules on a divertor plate	226

No.	Author	Title	Page
P2-79	Y. Yamauchi	Analysis of plasma-wall interaction using B and Ti material probes simulating the first wall in LHD	227
P2-80	P. F. Zheng	Mechanical properties of V-4Cr-4Ti after exposure in static lithium	228
P2-81	M. Tanaka	Water vapor adsorption properties of honeycomb type zeolite for tritium removal system	229
P2-82	M. Kondo	Nitriding treatment of reduced activation ferritic steel as functional layer for liquid breeder blanket	230
P2-83	T. Wajima	Adsorption of Water Vapor on Honeycomb-type Zeolitic Adsorbents	231
P2-84	N. Nishio	Study on the calibration of LHD neutron monitoring system	232
P2-85	K. Mori	Research on Economics and CO <sub>2</sub> Emission of Magnetic and Inertial Fusion Reactors	233
P2-86	Y. F. Li	Microstructure and Mechanical Properties of JLF-1 and CLAM Steels Exposed to Thermal Aging with Stress	234
P2-87	Y. Ohsawa	Electron Acceleration in Alfvén Waves behind Magnetosonic Shock Waves	235
P2-88	Y. Kondo	Effect of ion composition on oblique magnetosonic waves	236
P2-89	T. Iwata	Effect of Magnetic-Field Gradient on Positron Acceleration along the Magnetic Field in an Oblique Shock Wave	237
P2-90	S. Yoshimura	Observation of supersonic ion flow in a diverging magnetic field	238
P2-91	T. Moritaka	Full particle-in-cell simulation study on solar wind interaction with a small scale artificial magnetosphere	239
P2-92	S. Usami	Improvement of multi-hierarchy simulation model for studies on collisionless magnetic reconnection	240
P2-93	H. Nakamura	Hydrogen isotope irradiation on amorphous carbon	241
P2-94	S. Saito	Structural Change Process in Hydrogen-Carbon Material Interactions	242

No.	Author	Title	Page
P2-95	A. Takayama	Difference in plasma-surface interaction characteristics of amorphous-, mono-, and polycrystal materials	243
P2-96	T. Kusakabe	Charge-transfer cross sections of H <sup>+</sup> ions in collisions with some noble gas atoms in the energy range below 4.0 keV	244
P2-97	M. Emoto	Development of the portal web server for the LHD experiment	245
P2-98	H. S. Salapare III	Anti-bacterial property of hydrogen-ion and oxygen-ion treated polytetrafluoroethylene (PTFE) materials	246
P2-99	L. M. D. Rosario	Simultaneous growth of diamond-like carbon and nanorods via magnetron sputtering in a magnetized sheet plasma	247
P2-100	B. A. T. Suarez	Selective Coating Deposition of Solar Thermal Collectors on Aluminum and Copper Samples Using the Magnetized Sheet Plasma Negative Ion Source	248
P2-101	A. R. B. Gines	Surface free energy effects of low-energy hydrogen and oxygen ions on polytetrafluoroethylene (PTFE) materials	249
P2-102	M. M. S. Villamayor	Plasma optical emission signatures and TiO <sub>2</sub> deposition using the Dual Planar Magnetron	250
P2-103	T. Rungsirathana	Experimental Demo for Small-scale MHD Plasma Accelerator	251
