# Program

## Monday November 19th

	Title	Page
<b>Oral Session 1</b>		
<b>O1-1</b>	Tang, William	Challenges in Cross-Validation of Experiment and Modeling in Fusion Energy Sciences 23
<b>O1-2</b>	Simon, Pinches	Integrated Modelling and its Validation for ITER Plasmas 24
<b>O1-3</b>	Yican, Wu	A Practical Way to Fusion Application through Heavy Liquid Metal Cooled Hybrid Systems and Supporting R&D Activities in China 25
<b>Oral Session 2</b>		
<b>O2-1</b>	Hyeon, Park	Validation of MHD physics via 2-D ECE imaging in toroidal plasmas and perspective of 3-D imaging in KSTAR 26
<b>O2-2</b>	Ralchenko, Yuri	Spectroscopic modeling and data analysis for W ions of relevance to fusion 27
<b>O2-3</b>	Watanabe, Tetsuya	Evaluation of spectroscopic modeling for iron ions and study on non-equilibrium ionization phenomena for solar and LHD plasmas 28
<b>Poster Session 1</b>		
<b>Oral Session 3</b>		
<b>O3-1</b>	Sanderson, Allen	Advances in Scientific Analysis and Visualization 29
<b>O3-2</b>	Ohtani, Hiroaki	Analysis of Magnetic Confinement Plasmas by Virtual-Reality System 30

## Tuesday November 20th

	Title	Page
<b>Oral Session 4</b>		
<b>O4-1</b>	Yamada, Hiroshi	Development of Cross-Validation in Plasma Physics on the Large Helical Device 91
<b>O4-2</b>	Angioni, Clemente	Particle and momentum transport in tokamak plasmas 92
<b>O4-3</b>	Mikkelsen, David	Density Peaking in Turbulence Simulations of Alcator C-Mod Plasmas 93
<b>Poster Session 2</b>		
<b>Oral Session 5</b>		
<b>O5-1</b>	Darrow, Douglass	Comparison of measurement and modeling of stochastic loss of neutral beam ions during TAE avalanches in NSTX 94
<b>O5-2</b>	Michael, Clive, Alvin	Fast Ion Deuterium Alpha measurements and simulations on the Mega Amp Spherical Tokamak 95
<b>O5-3</b>	Kasuya, Naohiro	Numerical Diagnostics and Identification of Fluctuation Structure by Use of Turbulence Diagnostic Simulator 96

**Wednesday November 21st**

	Title	Page
<b>Oral Session 6</b>		
<b>O6-1</b>	Yamada, Masaaki	Study of Magnetic Self-organization Phenomena in Laboratory Plasmas 149
<b>O6-2</b>	Ono, Yasushi	Physics and Application of Magnetic Reconnection in Toroidal Plasmas 150
<b>O6-3</b>	Suzuki, Takeru	Waves and turbulences in solar and stellar atmosphere and wind 151
<b>Poster Session 3</b>		
<b>Oral Session 7</b>		
<b>O7-1</b>	Fukuyama, Atsushi	Kinetic integrated modeling of tokamak plasmas 152
<b>O7-2</b>	Kazuhiro, Miki	Spatio-Temporal evolution of LH transition 153
<b>O7-3</b>	Hole, Matthew, John	Advanced MHD models of anisotropy, flow and chaotic fields 154
<b>Oral Session 8</b>		
<b>O8-1</b>	Kirschner, Andreas	Modeling of impurity transport in the divertor of JET 155
<b>O8-2</b>	Ueda, Yoshio	Issues of tungsten as a plasma facing material for ITER and DEMO 156
<b>O8-3</b>	Nakashima, Yousuke	Characteristics of high heat-flux generation and divertor simulation experiments in the end-cell of the GAMMA 10/PDX tandem mirror 157
<b>O8-4</b>	XU, QIAN	The simulation prediction for the first castellated tiles experiment in EAST 158

**Thursday November 22nd**

	Title	Page
<b>Oral Session 9</b>		
<b>O9-1</b>	Tonny, Donne	From present fusion devices to DEMO: a changing role between diagnostic and modeling 213
<b>O9-2</b>	Hasuo, Masahiro	Spatial Distribution and Transport of Neutral Particles in a Fusion Plasma Reconstructed from Emission Observation 214
<b>O9-3</b>	Sakawa, Youichi	Collisionless shock formation in counter-streaming plasmas produced by large-scale intense lasers 215
<b>Poster Session 4</b>		
<b>Oral Session 10</b>		
<b>O10-1</b>	Kiptily, Vasily	Study of interaction between fast ions and MHD instabilities by fusion product measurements 216
<b>O10-2</b>	Sudo, Shigeru	Impurity transport study with TESPEL injection and simulation 217
<b>O10-3</b>	Takeuchi, Masaki	Development of Divertor IR Thermography for ITER 218
<b>O10-4</b>	Morishima, Kunihiro	Development of 14MeV neutron measurement with nuclear emulsion for D-T burning plasma oral 219

**Poster Session 1 (Monday November 19th)**

No.	Author	Title	Page
P1-1	Hudson,Stuart	Theory and numerics of the Stepped Pressure Equilibrium Code	31
P1-2	Mao ,Aohua	Linear and nonlinear dynamics of double tearing mode instability in the presence of sheared flows	32
P1-3	Yamasaki,Kotaro	Electron heating during magnetic reconnection in the UTST merging experiment	33
P1-4	Tanabe,Hiroshi	Two dimensional imaging measurement of magnetic reconnection outflow in the TS-4 toroidal plasma merging experiment	34
P1-5	Ishizawa,Akihiro	Magnetic island evolution in hot ion plasmas with ITG turbulence	35
P1-6	Yoshida,Masafumi	Distribution of plasma in JT-60 negative ion source	36
P1-7	Horiuchi,Ritoku	Influence of guide field on collisionless driven reconnection	37
P1-8	Ii,Toru	Spontaneous Three-Dimensional Magnetic Reconnection in TS-4 Merging Experiment	38
P1-9	Inomoto,Michiaki	Initiation of impulsively fast magnetic reconnection induced by current sheet ejection	39
P1-10	Sabot,Roland	Particle flow during sawtooth reconnection: numerical simulations of experimental observations	40
P1-11	Usami,Shunsuke	Hierarchy-Interlocking Model in the Downstream Direction for Simulation Studies of Magnetic Reconnection	41
P1-12	Xue,Erbing	PLASMA START-UP FIELD DESIGN BASED ON CCS METHOD	42
P1-13	Suzuki,YASUHIRO	Design of in and outer-vessel RMP coils in LHD	43
P1-14	watanabe,takenori	Plasmoids-induced Pull Reconnection Experiments on UTST	44
P1-15	ohashi,matsutsugu	Modeling tritium retention in ITER plasma facing materials	45
P1-16	niu,guo jian	Molecular dynamics investigations of plasma-facing components damage produced by dust bombardment	46
P1-17	Akiyama,Tsuyoshi	Impurity deposition on first mirror surface during hydrogen discharges in LHD	47
P1-18	Ito,Atsushi	Carbon dust formation from nano-scale graphene like molecules with molecular dynamics simulation	48
P1-19	Shigemura,Takuya	Evaluation of plasma wall interactions from material probe analysis in LHD	49

No.	Author	Title	Page
P1-20	NARUSHIMA,Yoshiro	Correlation between detached plasmas and plasma response field	50
P1-21	Armando,Marco	Deuterium retention in tungsten-coated reduced activation ferritic/martensitic steel	51
P1-22	Cui,Zhengying	Effect of wall conditioning and fuelling methods on H-mode in the HL-2A tokamak	52
P1-23	Matsuura,Hiroto	Improvement of heat conduction analysis of a small thermal probe	53
P1-24	Matsuyama,Masao	Tritium retention on stainless steel surface exposed to plasmas in LHD (II)	54
P1-25	Bawankar,Prakash	In vessel material migration study using toroidal probe array in LHD	55
P1-26	Takeiri,Yasuhiko	Installation of closed helical divertor with in-vessel cryo-pump and initial results of particle control experiment in LHD	56
P1-27	van Swaaij,Gijs	Carbon erosion by high-density H plasma diagnosed with CH emission	57
P1-28	Goto,Motoshi	A study of particle transport based on the Balmer-alpha line profile	58
P1-29	Isobe,Mitsutaka	Application of nuclear emulsion to neutron emission profile diagnostics in National Spherical Torus Experiment	59
P1-30	Ogawa,Kunihiro	Development of Lost Fast-Ion Probe Based on Thin Faraday Films in Heliotron J	60
P1-31	Kenmochi,Naoki	Development of a high time resolution Nd:YAG Thomson scattering system for Heliotron J	61
P1-32	Kobayashi,Hiroaki	Ion cyclotron resonance acceleration in diverging magnetic field on linear divertor simulator TPD-Sheet IV	62
P1-33	Tanaka,Suguru	Experimental simulation of close-divertor with V-shaped target in liner divertor simulator TPD-Sheet IV	63
P1-34	Wieland,Bernd	Evaluation of ion temperature and plasma rotation at LHD from charge-exchange spectra with photon-statistical weighting	64
P1-35	Sharov,Igor Alexandrovich	Polystyrene pellet cloud parameters: modeling, measurements and error estimation	65
P1-36	Funaba,Hisamichi	Simulation of spectral line emission in VUV range from impurities injected by TESPEL for absolute calibration	66

No.	Author	Title	Page
P1-37	SASAO,Mamiko	Issues for the absolute neutron emission measurement on ITER	67
P1-38	Leem,June-Eok	Turbulence physics study via 2-D microwave imaging reflectometry in KSTAR plasmas	68
P1-39	Tobias,Benjamin John	Electron cyclotron emission dynamics of the DIII-D pedestal	69
P1-40	Tokuzawa,Tokihiko	Developments of Terahertz Pulse Wave Diagnostics for Magnetized Fusion Plasma Reactor	70
P1-41	Oishi,Tetsutarou	Development of impurity profile diagnostics in the ergodic layer of LHD using 3 m normal incidence VUV spectrometer	71
P1-42	Sano,Ryuichi	Field of view optimization for IR imaging video bolometers in LHD	72
P1-43	MINATO,HARUNA	Development of 2.5 MeV Neutron Imaging using Stacked Nuclear Emulsions for Energetic Ion Diagnostics in Fusion Plasma	73
P1-44	Osakabe,Masaki	A plan for Fast Ion D-Alpha measurement on JT-60SA	74
P1-45	Ogasawara,Shinya	Optimization of a Mega-watt 77-GHz Gyrotron Operation for The Collective Thomson Scattering in LHD	75
P1-46	lee,jongha	Progress of KSTAR Thomson Scattering Diagnostic System in 2012	76
P1-47	Tsumori,Katsuyoshi	Electrostatic-field responses of ions and electrons in caesium seeded negative ion source	77
P1-48	Pandya,Shwetang	Optics design considerations for improving the sensitivity of the Infrared Imaging Video Bolometer on LHD	78
P1-49	Pandya,Santosh	Preliminary results of the Infrared Imaging Video Bolometer developed for the ADITYA tokamak and its comparison with 2-D radiation power loss model	79
P1-50	Tatumura,Nao	The Effect of Satellite Lines on Extreme Ultraviolet Laser of H-like Nitrogen in Recombining Plasma	80
P1-51	Yamamura,Shuhei	Effects of Photo Processes on the Lasing of Extreme Ultraviolet Light in Recombining Nitrogen Plasma	81
P1-52	Sasaki,Akira	Validation of collisional radiative model of high-Z multiple charged ions at NLTE code comparison workshops	82

No.	Author	Title	Page
P1-53	Suzuki,Chihiro	Interpretation of EUV spectra from tungsten and lanthanide ions observed in the Large Helical Device	83
P1-54	Iijima,Takaaki	Effect of high energy electron component on recombination plasma with pulse plasma flow	84
P1-55	Wada,Motoi	Extraction of negative hydrogen ions from radio frequency-driven plasma sources for fusion plasma heating	85
P1-56	Murakami,Izumi	Validation of collisional-radiative models of tungsten ions for EUV spectra	86
P1-57	Kusakabe,Toshio	Isotope effect on charge transfer cross sections of slow ${}^7\text{Li}^+$ ions in collisions with $\text{H}_2$ , HD, and $\text{D}_2$ molecules	87
P1-58	Kusakabe,Toshio	Charge transfer cross sections of slow doubly and triply charged carbon ions from CO and $\text{CO}_2$ molecules	88
P1-59	Kamitani,Atsushi	Numerical Method for Analyzing Shielding Current Density in HTS Film with Multiple-Layer/Multiply-Connected Structure	89

**Poster Session 2 (Tuesday November 20th)**

No.	Author	Title	Page
P2-1	Mukai,Kiyofumi	Particle Transport Characteristics in Heliotron J ECH plasmas	97
P2-2	Nunami,Masanori	Gyrokinetic Studies on ITG Turbulence and Transport Property in LHD Plasmas	98
P2-3	Sugama,Hideo	Gyrokinetic Field Theory for Time-Dependent Equilibrium Magnetic Fields	99
P2-4	nagamine,yasuo	Diffusive Transport Analysis in Low Aspect Ratio Reversed Field Pinch	100
P2-5	Funaba,Hisamichi	Impurity transport study in the impurity hole phenomenon by laser blow-off on LHD	101
P2-6	Yamakami,Tomoyuki	Analyses of Core Plasma Confinement and Internal Transport Barrier Formation in Tokamak and Helical Reactors	102
P2-7	Daniel,Den Hartog	Steps toward a validated understanding of electron thermal transport in the MST Reversed-Field Pinch	103
P2-8	Sasaki,Makoto	Probability distribution functions of particle and momentum fluxes in resistive drift wave turbulence in cylindrical magnetized plasmas	104
P2-9	Li,Jiquan	Dependence of Turbulent Blob/Hole Dynamics on the Collisionality in Tokamak Plasmas	105
P2-10	Nishioka,Kenji	An inclusion of external momentum input into the calculation of neoclassical transport and parallel flows	106
P2-11	Eliseev,Leonid	Peculiarities of electric potential in Ohmic and ECR heated plasmas in the T-10 tokamak	107
P2-12	Beletskii,Aleksey	Electrostatic edge plasma turbulence in the Uragan-3M torsatron	108
P2-13	nuga,hideo	Development of the kinetic transport simulation code in tokamak plasmas	109
P2-14	SUGITA,Satoru	Transient Response after Change of Input Power Intensity in Edge Turbulence	110
P2-15	Seto,Haruki	Development of two-dimensional transport simulation code in tokamak plasmas	111
P2-16	sakai,akira	Heat transport simulation in the time developing LHD plasmas by TASK3D	112
P2-17	SEKI,ryohsuke	Development of Transport Model in Collisionless High-Beta Plasmas based on LHD Experiment Scaling	113
P2-18	Yoshinuma,Mikirou	Driving of toroidal flow with tangentially injected neutral beams on LHD	114

No.	Author	Title	Page
P2-19	Tanaka,Kenji	The effect of resonant magnetic perturbation on particle transport in LHD	115
P2-20	Hasegawa,Hiroki	Simulation study of microscopic dynamics in a plasma coherent structure	116
P2-21	Ren,Yang	Experimental Observation of ExB Shear Induced Reduction in Electron-scale Turbulence and Thermal Transport in NSTX	117
P2-22	Barada,Kshitish Kumar	Current Free Double Layer Study in a Low Pressure Helicon Discharge	118
P2-23	MINAMI,Ryutaro	Development of High Power ECH Systems for High and ELM-like Heat Flux in GAMMA 10 Tandem Mirror	119
P2-24	Nishimura,Seiya	Simulation study of Alfvén eigenmode induced energetic-ion transport in LHD	120
P2-25	WANG,Hao	Linear Properties and Nonlinear Evolution of Energetic Particle Driven Geodesic Acoustic Mode	121
P2-26	Toida,Mieko	Simulation studies of detrapping of ultrarelativistic electrons from an oblique shock wave due to multi-dimensional fluctuations	122
P2-27	Melnikov,Alexander	Alfvén Eigenmodes in the combined NBI/ECRH plasmas in TJ-II	123
P2-29	Uragami,Tatsunori	Formation of forward and reverse shock waves in a magnetized plasma: Two-dimensional particle simulations	124
P2-30	Aota,Yukio	Theory for finite temperature effects on magnetosonic waves in two-ion-species plasmas	125
P2-31	Todo,Yasushi	Alfvén Eigenmodes and Energetic Particle Transport in ITER Steady State Scenario	126
P2-32	Otsuka,Fumiko	Numerical modeling of electrodeless electric thruster by ion cyclotron resonance/ponderomotive acceleration	127
P2-33	Blackwell,Boyd Douglas	Scaling and Structure of Fluctuations in the Alfvén Range of Frequencies in the H-INF Helic	128
P2-34	Hole,Matthew John	Analysis of Alfvén Wave activity in KSTAR plasmas	129
P2-36	Timohin,Vladimir	Study of a tokamak discharge control by means of lithium dust injection	130
P2-37	nihei,naoto	Deuterium retention and desorption behaviors of tungsten materials	131

No.	Author	Title	Page
P2-38	TAKAYAMA,Arimichi	First principles investigation on noble gas embedded tungsten	132
P2-39	Nishimura,Kiyohide	Particle detection with laser scattering measurement	133
P2-40	Zhou,Haishan	Bi-directional hydrogen permeation through F82H under DEMO-relevant conditions	134
P2-41	Oki,Kensuke	Measurements of plasma density and temperature near a V-shaped target of a divertor simulation experimental module in GAMMA 10	135
P2-42	Tomita,Yukihiro	Secondary electron emission from a negatively charged spherical dust particle by electron impact	136
P2-43	nakata,hiroyuki	Modeling beryllium deposition on tungsten and its interaction with hydrogen	137
P2-44	Nobuta,Yuji	Deuterium retention properties of co-deposited carbon films produced at wall gaps	138
P2-45	Hasegawa,Yoshito	Agglomeration process of carbon dusts in hydrogen plasma	139
P2-46	Kawamura,Gakushi	Kinetic effects of inclined magnetic field on secondary electron emission	140
P2-47	Togo,Satoshi	Effects of Neutral Particles on the Stability of Detachment Fronts in Divertor Plasmas	141
P2-48	ashikawa,naoko	Effects of helium bombardment on hydrogen retention in low-activation ferritic steel alloys	142
P2-49	Ida,Katsumi	Validation of energy dependence of emission cross section of charge exchange line of CVI	143
P2-50	Unigame,Tatsuya	Construction of Three-Dimensional Feature Point Model using Visual ID Tags for Virtual Assembly Systems	144
P2-51	Tamura,Yuichi	Augmented reality aided operation and maintenance system in indoor environment	145
P2-52	Ohdachi,Satoshi	Reconstruction of the phase information in the modulated ECH experiments measured by the tangentially viewing imaging system of the Large Helical Device	146
P2-53	Villamayor,Michelle Marie	High Dynamic Range Imaging of Atmospheric Jet Plasma and Low Pressure Magnetized Sheet Plasma	147

### Poster Session 3 (Wednesday November 21st)

No.	Author	Title	Page
P3-1	goto,ryohsuke	Extended MHD simulation of 2.5D Rayleigh-Taylor type instability	159
P3-2	Raburn,Daniel	Inclusion of pressure and flow in the 3D MHD equilibrium code KITES	160
P3-3	Takahashi,Toshiki	Toroidal flow velocity comparison between simulation and experiment for a field-reversed configuration	161
P3-4	von Nessi,Greg	Tokamak Equilibria Validation: Reconciling Theory and Observation via Bayesian Inference and BEAST	162
P3-5	Ueda,Ryosuke	Linear analyses of resistive interchange instability in LHD finite beta plasmas with stochastic field line structure	163
P3-6	Mykhaylenko,Volodymyr	Non-modal analysis of the diocotron instability	164
P3-7	UENO,Kenichi	Risk Assessment for ITER TF coil manufacturing	165
P3-8	Suzuki,YASUHIRO	Finite Beta Effects on Magnetic Field Structure in SDC LHD Plasmas	166
P3-9	Hasegawa,Soichiro	ECCD simulation by GNET with momentum conserving collisional operator	167
P3-10	Itoh,Taku	Investigation of Numerical Stability of Electromagnetic Wave Propagation Simulation using Meshless Time Domain Method	168
P3-11	Watanabe,Takashi	Hydrogen permeability of nitrided stainless steel	169
P3-12	Kisaki,Masashi	Behavior of secondary particles in multi-aperture accelerator	170
P3-13	Miyazawa,Junichi	Energy Confinement of Completely Detached Plasmas Fueled by Supersonic Gas Puffing in LHD	171
P3-14	Himura,Haruhiko	Initial results on simultaneous confinement of pure lithium ion and electron plasmas	172
P3-15	Atsumi,Kohei	Numerical Estimation of Ohmic loss of High Power Wideband Diplexer for ECCD System	173
P3-16	Kamei,Takanori	Accuracy Assurance in Binary Interaction Approximation for N-body Problems II	174
P3-17	Meneghini,Orso	Integrated modeling of tokamak experiments with OMFIT	175
P3-18	Yamaguchi,Hiroyuki	NBI heating analysis of time development plasma in LHD	176
P3-19	Okamura,Shoichi	Configuration optimization of a planar-axis stellarator with a reduced Shafranov shift	177

No.	Author	Title	Page
P3-20	Seki,Tetsuo	Experiment of ICRF heating in LHD in prospect of a fusion reactor	178
P3-21	kosuga,yusuke	Subcritical instability and zonal flow generation by drift holes	179
P3-22	Mizuguchi,Naoki	MHD simulation study on the evolution of filament structures on the edge-localized modes	180
P3-23	Imagawa,Shinsaku	Effect of Transient Heat Transfer on the Analysis of Propagation Velocity of the LHD Helical Coil	181
P3-24	kondo,masatoshi	Heat pulse flow meter for liquid breeder blanket	182
P3-25	Yamada,Takuma	Streamer structures in experiment and modeling	183
P3-26	Animesh ,Kuley	Fully kinetic simulation of radio frequency wave in fusion plasmas	184
P3-27	Kubo,Shin	Extension and Experimental Validation of 3D ray-tracing Code "LHDGauss"	185
P3-28	Drewelow,Peter	Comparison of Modelled Divertor Heat Flux and Experiments at LHD	186
P3-29	Ozaki,Tetsuo	Comparison of Electron Spectra in targets for FIREX using the Electron Spectrometer	187
P3-30	Sugiyama,Naoya	Research and Development of High Power Wide-band Polarizer for ECCD System in JT-60SA	188
P3-31	Nagaoka,Kenichi	Electrohydrodynamic convection driven turbulence in a rotating system and laboratory simulation of the solar convective zone	189
P3-32	Banerjee,Santanu	Edge turbulence characteristics of the Ohmic-ECRH driven plasma current phase investigated with fast visible imaging in QUEST	190
P3-33	Tamura,Naoki	Cross-comparison of nonlocal transport phenomenon in LHD heliotron with that in HL-2A tokamak	191
P3-34	Nishimura,Shin	Neoclassical transport of impurities in non-symmetric toroidal plasmas	192
P3-35	Tsuji,Yoshiyuki	Visualization and Velocity Fluctuation Measurement in Super Fluid He II	193
P3-36	Hilscher,Paul Peter	Gyrokinetic simulation of ion temperature gradient driven turbulence in the presence of a magnetic island and kinetic electrons	194
P3-37	Wakasa,Arimitsu	Heat transport simulation in LHD plasmas using the extended gyro-Bohm transport models with the effect of temperature gradient	195

No.	Author	Title	Page
P3-38	Satake,Shinsuke	Neoclassical heat transport analysis in a helical DEMO reactor concept FFHR-d1	196
P3-39	Mano,Junji	Influence of safety factor profile modification on bootstrap current fraction in tokamak fusion reactor	197
P3-40	Tanaka,Hirohiko	Non-Diffusive Cross-Field Transport in the LHD Detached Divertor Plasma	198
P3-41	YOKOYAMA,MASAYUKI	Development of Integrated Transport Analysis Suite for LHD Plasmas Towards Transport Model Validation and Increased Predictability	199
P3-42	Beletskii,Aleksey	Plasma flows formation in the helical divertor of the Uragan-3M torsatron and effects on these flows of the H-Like mode transition	200
P3-43	Toda,Shinichiro	Transport Analysis of Density Limit for the Plasma Dynamics in Helical Plasmas	201
P3-44	ZANG,Linge	Study of Filament Features of Edge Plasma Fluctuations using Fast Camera and Langmuir Probe Measurements in Heliotron J	202
P3-45	Masaoka,Yoshitada	Study of nonlinear collision effect on high-energy ion confinement in the LHD plasma	203
P3-46	Makino,Ryohei	Local and Fast Density Pump-out by ECRH in the LHD	204
P3-47	YAMAMOTO,Satoshi	Studies of magnetic island using RMP and optimized magnetic measurement in Heliotron J plasmas	205
P3-48	Murakami,Akiyoshi	ELM frequency control using high frequency supersonic gas puffing in LHD	206
P3-49	Ikari,Tomoaki	Validation of turbulent transport models using 1.5D transport code TASK/TR	207
P3-50	Tsuji,Yoshiyuki	Boiling of Liquid Helium and Periodic Oscillation in Narrow Rectangular Duct	208
P3-51	FUHR,guillaume	Comparison of physical models for plasma edge turbulence with experimental parameters	209
P3-52	Watanabe,Tomo-Hiko	Flux tube bundle model for gyrokinetic simulations in helical systems	210
P3-53	CHAN,POH KAM	Numerical Analysis of Quantum Mechanical $\nabla B$ Drift III	211

## Poster Session 4 (Thursday November 22nd)

No.	Author	Title	Page
P4-1	WATANABE,Tsuguihiro	Alpha particle confinement control of geodesic winding LHD-type fusion reactor	220
P4-2	Kondo,Takuya	Economic Analysis of Advanced Fuel Fusion Reactors and Derivation of Scaling Law for COE	221
P4-3	Ito,Atsushi	Eigenmode analysis of Kelvin-Helmholtz/Rayleigh-Taylor instability based on the extended MHD model	222
P4-4	Shimozuma,Takashi	High Harmonic ECH Experiment for Extension of Heating Parameter Regime in LHD	223
P4-5	Soga,Yukihiro	Mechanisms of $E \times B$ drift rotation of a vortex string in a pure electron plasma	224
P4-6	Kajimura,Yoshihiro	Numerical Simulation of Dipolar Magnetic Field Inflation by Equatorial Ring-current	225
P4-7	Taniike,Akira	Charge fraction measurements for heavy particle beams generated by the tandem accelerator with MCP system.	226
P4-8	HAMAGUCHI,Shinji	Numerical model for cooling analysis on helical coils for helical DEMO reactor FFHR-d1	227
P4-9	Sawada,Daisuke	Effect of nuclear plus interference scattering on fast $\alpha$ -particle orbit and confinement in magnetic field configuration	228
P4-10	Miyata,Yoshiaki	Study of JT-60SA operation scenario using a plasma equilibrium control simulator	229
P4-11	shiraiwa,shunichi	Design of off-midplane launcher (LH3) base on velocity space synergy for Alcator C-Mod	230
P4-12	omoto,naoki	Ablation Rate Measurements For Inertial Fusion Wall Materials	231
P4-13	hatori,tomoharu	Hall/FLR effects on shear-flow instability	232
P4-15	Takahata,Kazuya	Effect of Bending on Critical Current and n-Value of React-and-Jacket Processed Nb3Sn Conductor	233
P4-16	MIURA,Hideaki	Application of a portable AMR module for plasma simulation codes	234
P4-17	Takayama,Teruou	Numerical investigations on detectability of crack by contactless jC-measurement method	235
P4-18	Kamada,Keiichi	Frequency selectivity of a normal and a hybrid Bragg resonators	236
P4-19	Araki,Keisuke	Reduction of nonlinear effects in magnetohydrodynamic and Hall magnetohydrodynamic turbulence	237

No.	Author	Title	Page
P4-20	fujita,yoshihisa	Three-dimensional analysis of electromagnetic wave propagation using meshless time domain method	238
P4-21	Ogura,Kazuo	Higher order mode radiations of weakly relativistic oversized backward wave oscillator	239
P4-22	Okamura,Takeshi	Analysis of electromagnetic wave propagation in a corrugated millimeter waveguide by three-dimensional Finite-Difference Time-Domain Simulation	240
P4-23	Miwa,Yudai	Evaluation of excitation conditions of ITG modes in PANTA device	241
P4-24	Saitoh,Ayumu	Smooth Modelling with Implicit-Function Representation for Microsoft Kinect Sensor	242
P4-25	Shimizu,Akihiro	Bifurcation-like behavior of electrostatic potential in LHD	243
P4-26	Park,Jong-Kyu	Bounce Harmonic Resonances in Neoclassical Toroidal Viscosity	244
P4-27	ICHIGUCHI,Katsuji	Multi-Scale MHD Simulation of LHD Plasma in Magnetic Axis Swing Operation	245
P4-28	Takeno,Hiromasa	Experimental and numerical study on two-stage deceleration in a cusp-type direct energy converter simulator	246
P4-29	Nishimura,Reiya	Experiment of outboard helical field application on tokamak plasmas in TOKASTAR-2	247
P4-30	Watanabe,Osamu	Steady-state Tokamak equilibrium specified magnetic axis and separatrixes	248
P4-31	gomi,keita	Electric field effect on plasma shielding with a rotating magnetic field for a space elevator	249
P4-32	Masaharu,Matsumoto	2D AMR-PIC Plasma Simulation for Mini-Magnetosphere of Magnetized Objects	250
P4-33	Izumi,Satohiro	Study of radial diffusion of passing and trapped energetic ions by high-m magnetic perturbation in a toroidal plasma	251
P4-34	Yagi,Yohei	Development of Parallelized AMR-PIC Plasma Simulation Code with Dynamic Domain Decomposition	252
P4-35	Nagara,Akihide	Development of an AMR Module for Various Numerical Simulations	253
P4-36	Funaki,Ikkoh	Spacecraft Propulsion using the Solar Wind: Numerical Simulation and Experimental Simulation in Laboratory	254

No.	Author	Title	Page
P4-38	Peterson, Byron Jay	Imaging bolometers for visualization of plasma radiation and cross-validation of three dimensional impurity transport models for the Large Helical Device	255
P4-39	Yasuhara, Ryo	Synchronized measurement of the Thomson scattering system and the pellet injection by using the event triggering system in LHD	256
P4-40	tashima, saya	Non-inductive current drive by EC waves in an in-board poloidal magnetic field null configuration on the spherical tokamak QUEST	257
P4-41	Kim, Minwoo	Comparison study of 2-D images of ELMs by ECEI with BOUT++ simulations in KSTAR H-mode plasma	258
P4-42	Tsuchiya, Hayato	Development of Digital Correlation ECE	259
P4-43	Sanpei, Akio	Evaluation of 3-D Structure in low-aspect-ratio RFP RELAX	260
P4-44	Yatsuka, Eiichi	Anisotropic Electron Velocity Distribution Function Measurements by Double Pass Thomson Scattering in LHD	261
P4-45	Takahashi, Hideaki	Measurement of ion saturation current and floating potential profile in divertor region on QUEST	262
P4-46	Emoto, Masahiko	Calculation of Wavenumber Spectrum of MIR using Hopfield network model	263
P4-47	nishiura, masaki	70 GHz range notch filter for microwave plasma diagnostics	264
P4-48	Yamada, Ichihiro	Design of the LHD edge Thomson scattering system	265
P4-49	MUTO, Sadatsugu	Application of photo-absorption for x-ray spectroscopy in LHD	266
P4-50	Choe, Gyuenghyuen	Identification and verification of the modified sawtooth instability assisted by core ECRH/ECCD in KSTAR	267
P4-51	Tahiliani, Kumudni	Estimation of effective responsivity of AXUV Bolometers in ADITYA Tokamak by spectrally resolved radiation power measurement	268
P4-52	WANG, ERHUI	Two-dimensional distribution of electron temperature in ergodic layer of LHD measured from line intensity ratio of CIV and NeVIII	269
P4-53	Nakanishi, Hideya	Design improvement for a common data platform of high scalability and fast recovery	270
