

Plasma Physics and Controlled Fusion

Volume 55 Number 1 January 2013

SELECTED PAPERS FROM THE JOINT 18TH INTERNATIONAL STELLARATOR HELIOTRON WORKSHOP AND THE 10TH ASIA PACIFIC PLASMA THEORY CONFERENCE

BRIEF COMMUNICATION

- 012001 Density sensitivity of intrinsic rotation profiles in ion cyclotron range of frequency-heated L-mode plasmas**
M L Reinke, J E Rice, A E White, M Greenwald, N T Howard, P Ennever, C Gao, A E Hubbard and J W Hughes

EDITORIAL

- 010201 Selected papers from the Joint 18th International Stellarator Heliotron Workshop and the 10th Asia Pacific Plasma Theory Conference**
M J Hole, B D Blackwell and M Zarnstorff

SPECIAL SECTION PAPERS

- 014001 Dynamics of zonal-flow-like structures in the edge of the TJ-II stellarator**
J A Alonso, J L Velasco, J Arévalo, C Hidalgo, M A Pedrosa, B Ph Van Milligen, D Carralero and C Silva
- 014002 Comparison of the flows and radial electric field in the HSX stellarator to neoclassical calculations**
A Briesemeister, K Zhai, D T Anderson, F S B Anderson and J N Talmadge
- 014003 Stellarator optimization under several criteria using metaheuristics**
F Castejón, A Gómez-Iglesias, M A Vega-Rodríguez, J A Jiménez, J L Velasco and J A Romero
- 014004 Generalized action-angle coordinates defined on island chains**
R L Dewar, S R Hudson and A M Gibson
- 014005 Magnetohydrodynamic helical structures in nominally axisymmetric low-shear tokamak plasmas**
J P Graves, D Brunetti, I T Chapman, W A Cooper, H Reimerdes, F Halpern, A Pochelon, O Sauter, the TCV team and the MAST team
- 014006 Aspects of steady-state operation of the Wendelstein 7-X stellarator**
J Geiger, R C Wolf, C Beidler, A Cardella, E Chlechowicz, V Erckmann, G Gantenbein, D Hathiramani, M Hirsch, W Kasperek, J Kießlinger, R König, P Kornejew, H P Laqua, C Lechte, J Lore, A Lumsdaine, H Maaßberg, N B Marushchenko, G Michel, M Otte, A Peacock, T Sunn Pedersen, M Thumm, Y Turkin, A Werner, D Zhang and the W7-X Team
- 014007 Fast particle modifications to equilibria and resulting changes to Alfvén wave modes in tokamaks**
M J Hole, G von Nessi, M Fitzgerald and the MAST team
- 014008 Macro- and microphysics of magnetic reconnection in a multi-hierarchy open system**
R Horiuchi, M Den, T Tanaka, H Ohatni and S Usami
- 014009 Numerical magnetohydrodynamic analysis of Large Helical Device plasmas with magnetic axis swing**
K Ichiguchi, S Sakakibara, S Ohdachi and B A Carreras
- 014010 Schemes of microwave heating of overdense plasmas in the stellarator TJ-K**
A Köhn, G Birkenmeier, A Chusov, P Diez, A Feuer, U Höfel, H Höhnle, E Holzhauer, W Kasperek, S Merli, M Ramisch, J Seifert, S Wolf and U Stroth
- 014011 Dynamic transport study of heat and momentum transport in a plasma with improved ion confinement in the Large Helical Device**
H Lee, K Ida, M Osakabe, M Yokoyama, C Suzuki, K Nagaoka, R Seki, M Yoshinuma, N Tamura and LHD Experiment Group
- 014012 Coarse-graining study of homogeneous and isotropic Hall magnetohydrodynamics turbulence**
H Miura and K Araki

(Continued on inside back cover)

- 014013 Influence of resonant magnetic perturbation on a rotating helical plasma**
S Nishimura, S Toda, Y Narushima and M Yagi
- 014014 Modification of the magnetic field structure of high-beta plasmas with a perturbation field in the Large Helical Device**
S Sakakibara, Y Suzuki, Y Narushima, K Y Watanabe, Y Takemura, S Ohdachi, K Ida, M Yoshinuma, K Narihara, I Yamada, K Tanaka, T Tokuzawa, H Yamada and LHD Experiment Group
- 014015 Collisionless damping of flows in the TJ-II stellarator**
E Sánchez, R Kleiber, R Hatzky, M Borchardt, P Monreal, F Castejón, A López-Fraguas, X Sáez, J L Velasco, I Calvo, A Alonso and D López-Bruna
- 014016 Development and application of real-time magnetic coordinate mapping system in the Large Helical Device**
C Suzuki, K Ida, Y Suzuki, M Yoshida, M Emoto and M Yokoyama
- 014017 Gyrokinetic simulations of entropy transfer in high ion temperature LHD plasmas**
T H Watanabe, H Sugama, M Nunami, K Tanaka and M Nakata
- 014018 Self-organized confinement by magnetic dipole: recent results from RT-1 and theoretical modeling**
Z Yoshida, H Saitoh, Y Yano, H Mikami, N Kasaoka, W Sakamoto, J Morikawa, M Furukawa and S M Mahajan

PAPERS

- 015001 Transport in threshold plasmas for a confinement transition in the TJ-II stellarator**
D López-Bruna, J L Velasco, M Ochando, J Guasp, A López-Fraguas, B P van Milligen, E Ascasibar, M Liniers, T Estrada, J M Fontdecaba, I Pastor, D Tafalla, F Medina, L Eliseev, A Melnikov, S Perfilov, J Herranz, B Zurro, K J McCarthy, F Tabarés and the TJ-II Team
- 015002 Ergodicity of gyrofluid edge localized ideal ballooning modes**
J Peer, A Kendl and B D Scott
- 015003 Spatial structure of drift-wave turbulence and transport in a stellarator**
G Birkenmeier, M Ramisch, G Fuchert, A Köhn, B Nold and U Stroth
- 015004 Experimental investigation of the potentials modified by radio frequency sheaths during ion cyclotron range of frequency on EAST**
C M Qin, Y P Zhao, H Q Wang, X J Zhang, B N Wan, J-M Noterdaeme, F Braun, V Bobkov, Hiroshi Kasahara, E H Kong, L Wang, Y Shuai, Z X He, B J Ding, ICRF Team and EAST Team
- 015005 Asymmetric toroidal flux generation due to phase locking of internally resonant tearing modes in the RELAX reversed-field pinch**
R Ikezoe, S Masamune, K Oki, A Sanpei, H Himura, T Onchi and A Hirose
- 015006 Effect of resonant magnetic perturbations with toroidal mode numbers of 4 and 6 on edge-localized modes in single null H-mode plasmas in MAST**
A Kirk, I T Chapman, J Harrison, Yueqiang Liu, E Nardon, S Saarelma, R Scannell, A J Thornton and the MAST team
- 015007 Perturbative study of energetic particle redistribution by Alfvén eigenmodes in ITER**
N N Gorelenkov and R B White
- 015008 Finite Larmor radii effects in fast ion measurements with neutron emission spectrometry**
J Eriksson, C Hellesen, E Andersson Sundén, M Ceconello, S Conroy, G Ericsson, M Gatun Johnson, S D Pinches, S E Sharapov, M Weiszflog and JET EFDA contributors
- 015009 Electromagnetic gauge invariance of the nonlinear gyrokinetic theory and its implication for the truncation in gyrokinetic simulations**
Yingfeng Xu and Shaojie Wang
- 015010 Core transport analysis of nitrogen seeded H-mode discharges in the ASDEX Upgrade**
G Tardini, R Fischer, F Jenko, A Kallenbach, R M McDermott, T Pütterich, S K Rathgeber, M Schneller, J Schweinzer, A C C Sips, D Told, E Wolfrum and the ASDEX Upgrade Team
