

Contents

On the definition of a positive frequency part for a quantized scalar field in several Robertson-Walker universes	H. Nariai and T. Azuma	1
A gauge invariant approach to two-dimensional quantum chromodynamics	K. Kikkawa	15
A unified potential for mesons and baryons	R. K. Bhaduri, L. E. Cohler and Y. Nogami	30
Longitudinal polarization of ^{12}B in muon capture reaction	H. Ami, M. Kobayashi, H. Ohtsubo and M. Morita	45
Radiative pion capture on ^{12}C	N. Ohtsuka and H. Ohtsubo	62
Production of charged pions by high energy photon on nuclei	Y. Futami and J. Suzumura	78
Short range part of baryon-baryon interaction in a quark model. I —Formulation—	M. Oka and K. Yazaki	91
Inelastic scattering of pions on ^{12}C	F. M. Toyama, Y. Hatsuda and Y. Sakamoto	107
On the bound state of the trineutron by solving the Faddeev equation in coordinate space	Y. Sunami	116
Microscopic approach to two-nucleon absorption of in-flight pions in nuclei	T. Takaki	124
Relativistic corrections to perturbation theory for pionic and kaonic atoms	M. Leon and R. Seki	137
Nuclear effective interactions and spin excitations	T. Kohmura	145
Damping state method and kaonic bound states	M. Atarashi	163
A separable potential and off-shell scattering amplitude for an α - A interaction	S. Oryu and R. Kircher	176
Continuous radiation spectra of positron annihilation in flight	K. Shizuma, S. Hamanaka and Y. Yoshizawa	180
Ionization of atomic hydrogen by electron impact in the eikonal		

approximation with exchange	T. Sekimura	185
Feasibility of using a high-Rydberg atom in a collision experiment as a probe to scattering of an extremely slow electron by a rare-gas atom	K. Sasano and M. Matsuzawa	197
Low-energy phaseshift formula for e^\pm -atom elastic scattering	T. Sasakawa and J. Horáček	203
Triple differential cross sections for the ionization of atomic hydrogen by electron impact in the Coulomb-projected-eikonal approximation	W.-J. Chen	209
Eikonal approach to break-up processes of hydrogen-like ions by electron impact: Exchange of electrons	H. Kotegawa	218
Spectral line shifts produced by electron collisions in HeII plasma	K. Yamamoto	227
Interaction of ion-acoustic solitons in two-dimensional space	F. Kako and N. Yajima	238
Physics of wave-particle interactions	K. Nishikawa	247
An energy integral and variational principle for plasma kinetic modes	S.-I. Itoh, K. Itoh and Y. Terashima	267
Stiff-chain statistics in relation to the Brownian process	A. Miyake	272
Additional facilities of a conventional DBMS to support interactive statistical analysis	H. Ikeda and Y. Kobayashi	279
Conjugate shake-up process of neon due to K-shell photoionization	T. Ishihara, J. Mizuno and T. Watanabe	291
Scattering by a Coulomb plus spin-orbit interaction in the Glauber approximation	V. Franco	297
Electron capture into partially stripped projectile ions	J. Eichler, A. Tsuji and T. Ishihara	302
Energy loss by slow electron and by slow atoms in a molecular gas	I. Shimamura	310
Delta-hole formalism of pion-nucleus single charge exchange scattering	M. Hirata	314
p-state contribution to the A well depth	M. Kimura, Y. Takahashi and E. Satoh	321
