

CONTENTS

Session 1: Invited and Plenary

- 1 **Recent Progress in Researches on Helical Plasma**1
M. Fujiwara and LHD group
- 2 **The Position of Fusion/Fission Hybrid Reactor in
China Nuclear Power Program**2
Xiwen. Deng
- 3 **Status and Strategy of Fusion Engineering in Japan**7
Kenzo Miya
- 4 **High Performance Plasma and Plasma Wall Interaction
in TRIAM-1M, Next Program**8
S. Itoh and TRIAM Group
- 5 **Japan-USA and International Collaboration in Fusion Engineering Field**9
Katsunori. ABE
- 6 **Toroidal Reactor Designs as a Function of Aspect Ratio**10
C. P. C. Wong, J. C. Wesley, R. D. Stambaugh, E. T. Cheng
- 7 **Al₂O₃ Composites Made by Directed Al Oxidation into the Oxide Fiber Board**15
Il-Soo Kim, Geun-Hyoung Lee

Session 2-B: Materials

- 8 **Application of Free Electron Laser to Silicon Isotope Separation**19
T. Noda, H. Suzuki, J.L. Lyman and B. E. Newnam
- 9 **Thermal Conductivity and Specific Heat of Isotopically Enriched
Boron Single Crystal at Low Temperature**23
*HU, Quanli, NODA Tetsuji, NOGI Naoyuki, TANAKA Satoru, SUZUKI Hiroshi,
NUMAZAWA Takatori, ARAI Osamu, HIRANO Toshiyuki*
- 10 **Phase Transformation in γ -TiAl Alloy Induced with Xe-Ion Irradiation**27
*M. SONG, K. MITSUISHI, M. TAKEGUCHI, K. FURUYA, H. YASUDA, T. TANABE
and T. NODA*
- 11 **Electrical Conductivity of Undoped and Cr³⁺ Doped
Alumina under Electron Irradiation**28
T. Higuchi, K. Shiiyama, Y. Izumi, M. M. R. Howlader, M. Kutsuwada and C. Kinoshita
- 12 **Materials Research for Vanadium Alloy/Liquid Li Blanket
System in Fusion Engineering Research Center of NIFS**33
T. Muroga, T. Nagasaka and A. Suzuki

Session 2-C: Vanadium Alloys

- 13 **Microstructural Evolution in Vanadium Alloys under Neutron
Irradiation with Varying Temperature**34
N. NITA, K. Fukumoto and H. Matsui
- 14 **Development of Low Activation Vanadium Alloys with High
Resistance to Irradiation and Corrosion**40
M. Fujiwara, T. Chuto, M. Satou, K. Abe and A. Hasegawa
- 15 **Temperature Dependence of Damage Evolution in V-4Cr-4Ti
Alloy under Heavy Ion Irradiation**41
M. Suda, H. Watanabe, N. Yoshida

Session 3-A: SiC/SiC Composite

- 16 **Development of RS-SiC/SiC Composites with Modified Fiber
Preform Preparation Route**42
S. P. Lee, J. S. Park, S. Dong, Y. Katoh, A. Kohyama and H. K. Yoon

17	Preparation of Large-Sized SiCf/SiC Composites by CVI Method47 <i>Hiroshi Araki, Tetsuji Noda, Wen Yang, and Akira Kohyama</i>
18	Processing Optimization of 2D Tyranno-SA/SiC Composites by Hot Pressin51 <i>S. M. Dong, Y. Katoh, S. P. Lee, M. Kotani, and A. Kohyama</i>
19	CVI Hi-Nicalon/SiC Composites with Various PyC-SiC Interlayers56 <i>W. Yang, H. Araki, T. Noda, T. X. Liang, Y. Katoh, T. Hinoki, J. Yu, and A. Kohyama</i>
20	Effect of Multi-ion-beam Irradiation on Microstructure62 Evolution of SiC/SiC Composite <i>S. Nogami, A. Hasegawa, K. Abe, T. Taguchi, and S. Jitsukawa</i>
21	Surface Modification of SiC by He Ion Irradiation and66 Its Application for Temperature Monitoring <i>A. Hasegawa, S. Murakami, S. Nogami, S. Ohtsuka, M. Satou, K. Abe</i>

Session 4-A: Defects and Radiation Damage

22	Ab Initio Calculation and the First Principle Studies of Some Metal Hydrides67 <i>Shuming Peng, Pengji Zhao, Xinggui Long, Maonian Yang and Zhilei Xu</i>
23	Computer Simulation of the Interaction between a Dislocation and72 Point Defects in Fe and Ni <i>E. Kuramoto, K. Ohsawa and T. Tsutsumi</i>
24	Computer Simulation of the Interaction between Impurity73 Element and Irradiation Defects <i>WAN Farong and HUANG Xiuqi</i>
25	Simulation of Damage Creation in Iron Induced by High Energy74 Heavy Ion Irradiations <i>Zhiguang Wang, Yunfan Jin</i>
26	A Comparison of the Defect Structures in Ni Irradiated by Neutrons and Ions78 <i>T. Ishizaki, Q. Xu, T. Yoshiie, H. Ohkubo, and N. Yoshida</i>
27	High Energy Heavy Ion Induced Damage Production in Metals83 with Low Melting Points <i>Zhiguang Wang, M. Toulemonde, Yunfan Jin, C. Dufour, J. Dural, E. Paumier, F. Pawlak</i>
28	Dynamical Observation of Grain Boundary Movement by in-situ87 Irradiation using Atomic-Resolution HVEM <i>N. Sakaguchi, T. Shibayama, H. Kinoshita and H. Takahashi</i>
29	Focused-Ion-Beam Micro-sampling Technique and its Application90 to Micro-mechanical and Microstructural Analysis <i>A. Kohyama, H. Tanigawa, M. Ando, H. Kishimoto, T. Hirose, K. Jimbo and Y. Katoh</i>
30	Microstructure Evolution in Oxide Ceramics under Displacive91 and Ionizing Radiation <i>K. Yasuda and C. Kinoshita</i>

Session 3-A: Plasma Facing Materials

31	Development of Plasma Facing Materials and Components in JAERI97 <i>M. Akiba</i>
32	Damage of Plasma-Sprayed Tungsten Coated Carbon by Exposure98 of High Heat Flux and Deuterium/Helium Plasmas <i>K. Tokunaga, Y. Kubota, N. Noda, N. Yoshida, R.P. Doerner, R. Seraydarian, T. Sogabe, T. Kato, B. Schedler</i>
33	Aging and Irradiation Response in Cu/SS Joint Materials104 <i>Q. Xu, T. Yoshiie, T. Muroga, N. Yoshida and T. Iwai</i>

Session 4-B: System and Blanket

34	Recent Fusion Material Research Activities at SWIP108 <i>Zhang Fu, Liu Xiang, Chen Jiming, Wu Jihong, Yang Lin, Wang Mingxu, Xu Zengyu</i>
----	--

35	A Fusion Neutron Source Driven Sub-critical Nuclear114 Energy System: A Way for Early Application of Fusion Technology <i>Yican Wu</i>
36	Studies on Flibe Blanket Designs in Helical Reactor FFHR123 <i>SAGARA, Akio, KUNUGI Tomoaki, MATSUMOTO Youji, SATAKE Shin-ichi, YAMANISHI Hirokuni, WU Yican, MATSUI Hideki, TAKAHASHI Shintaro, YAMAMOTO Takuya, TODA Saburo, TERAJ Takayuki, TANAKA Satoru, UDA Tatsuhiko, FUKUDA Satoshi, NISHIKAWA Masabumi, SHIMIZU Akihiko, YOSHIDA Noaki and MOTOJIMA Osamu</i>
37	Gamma Leakage Spectrum on Vanadium Benchmark with 14MeV Neutron Source124 <i>Yuan Chen, Li An, Yunfeng Mou, Haipin Guo</i>
38	Transmutation of Mionr Actinides in a ST Tokamak Fusion Reactor128 <i>Kaiming FENG, Guoshu Zhang</i>
39	Activation Analysis of Materials Irradiated by Fusion Neutrons132 <i>Qunying Huang, Yican Wu</i>
40	Compatibility Test of AlN with Liquid Lithium under Nitrogen Control137 <i>Toshiharu Sakurai, Toshiaki Yoneoka and Satoru Tanaka</i>

Session 5-A: RAF Steels and others

41	MHD Effects Caused by Cracks in Insulator Coatings Pipe142 <i>Pan Chuanjie, Xu Zengyu, Chen Xiaoqiong and Zhang Yanxu</i>
42	Flibe Assessment147 <i>Dai-Kai Sze</i>
43	Engineering Outline Design Study of a Fusion Experimental Breeder148 <i>J. Huang, K. Feng, B. Deng, P. Deng, G. Zhang, K. He, X. Zhou, Y. Zhu, G. Huo, T. Huo, G. Sheng</i>
44	Study on Automatic Modeling of Monte Carlo Transport Simulation153 Based on Half Space Theory. <i>Xiaoping LIU, Yuetong LUO, Qunying HUANG Yiacan WU</i>
45	Main Pipe Rupture Accident Analysis for a Pool Type Sodium Cooled EBR159 <i>Yang, Hongyi</i>
46	Fatigue Response of F82H Steel under 17 MeV Proton Irradiation at 60°C164 <i>Y. Murase, Johsei Nagakawa, N. Yamamoto and T. Sato</i>
47	Small Specimen Testing and Micro Analysis of Fatigue168 Behavior in Ferritic/Martensitic Steel <i>A. Kohyama, T. Hirose, M. Ando, H. Tanigawa, Y. Katoh and S. Jitsukawa</i>
48	Feasible Performance of Reduced Activation Ferritic Steels169 for Fusion Application <i>A. Kimura, R. Kasada, A. Kohyama, A. Hasegawa, H. Matsui</i>
49	Tensile Properties and Fracture Toughness of Low Activation175 Ferritic Steel(JLF-1) at Room Temperature (I) <i>H. K. Yoon, S.P. Lee, T. Hirose and A. Kohyama</i>
50	Fracture Toughness Behavior of Low Activation Ferritic Steel(JLF-1)179 at 400°C by using UC Method (II) <i>H. K. Yoon, C. S. Seok, T. Hirose, S. P. Lee and Kohyama</i>
51	High Temperature Capability in ODS Ferritic Tubes180 <i>Shigeharu Ukai, Shunji Mizuta, Tunemitsu Yoshitake, Takanari Okuda, Shigeki Hagi, Masayuki Fujiwara and Toshimi Kobayashi</i>
52	Study on Manufacturing Process of ODS Ferritic Alloy Thin186 Walled Tube for Advanced FBR Cladding Application <i>Tian Yun, Liu Guangzu, Shan Bingquan</i>
53	Creep Response of Low Activation Martensitic Steel to192 Large Concentration Helium Implantation <i>N. Yamamoto, Y. Murase, J. Nagakawa, and K. Shiba</i>

54	Effect of Heat Mechanical Treatment on the Irradiation Resistance of a Reduced Activation Ferritic Steel F82H	197
	<i>S. Jitsukawa, E. Wakai, K. Shibata and T. Sawai</i>	
55	Microstructure Development in Electron / Helium Dual Irradiated Fe-Cr-Mn Alloys	198
	<i>S. Ohyagi, H. Kinoshita, Hu Benfu and H. Takahashi</i>	
56	Phase Stability in a Metastable Austenitic Fe-Cr-Mn (W, V) Alloy	199
	<i>Hu Benfu, Jia Chengchang, Hiroshi Kinoshita, Heishichiro Takahashi</i>	
57	Swelling of SUS 304 and SUS 316 Stainless Steels under Heavy Ion Irradiation at Low Temperatures	206
	<i>Katsuhiko Fujii, Gen Furutani, Koji Fukuya, Taira Okita, Naoto Sekimura</i>	
58	Microstructural Evolution during Variable Temperature Irradiation in Phosphorus added Austenitic Stainless Steels	207
	<i>D. Hamaguchi, H. Watanabe, N. Yoshida, T. Muroga</i>	
59	Dynamic Irradiation Effect on the Fatigue Cracking of 316 Stainless Steel	212
	<i>Y. Murase, Josei Nagakawa, N. Yamamoto and T. Sato</i>	

Session 6-C: Hydrogen and Tritium

60	Ion-and Plasma-Driven Permeation Behavior of Hydrogen Isotopes through Niobium in the Presence of Surface Impurities	216
	<i>K. Yamaguchi, K. Ohkoshi, T. Matsushima, T. Terai, M. Yamawaki, A. Busnyuk and A. Livshits</i>	
61	Hydrogen Permeation through MANET II Steel with Hot Dipping Aluminized Coating	222
	<i>Z. Y. Yao, M. Chini, A. Aiello, G. Benamati</i>	
62	Adsorption Equilibria of Krypton, Xenon on H-mordenite	226
	<i>Seigo KANJO, Kenzo MUNAKATA, Satoshi YMATUKI, Kenji TANAKA, Teruki FUKUMATU, Masabumi NISHIKAWA</i>	
63	Desorption of Tritiated Water from Metal Oxide Surface	232
	<i>Kunihito Chiba, Toshiaki Yoneoka and Satoru Tanaka</i>	
64	Tritium Release from Li₂BeF₄ Molten Salt Breeder under Neutron Irradiation at Elevated Temperature	235
	<i>Akihiro Suzuki, Takayuki Terai and Satoru Tanaka</i>	
65	Correlation Between Tritium Release Processes and Thermal Annealing of Damage Induced by Neutron Irradiation in Li₄SiO₄	236
	<i>S. Akahori, Y. Morimoto, E. Tega, K. Okuno, M. Nishikawa, K. Munakata, Y. Yokoyama, H. Moriyama, K. Kuwamoto and M. Okada</i>	
66	Effects of Helium Bombardment on the Deuterium Behavior in Tungsten	241
	<i>H. Iwakiri, N. Yoshida</i>	
67	Vibrational Excitation and the Effective Collision Rates of Hydrogen Molecules in Low Temperature Plasmas	246
	<i>Bingjia Xiao, Satoru Tanaka and Shinichiro Kado</i>	
68	Initial Tritium Inventory to Start up FEB	247
	<i>Deng Baiquan, Huang Jinhua</i>
