## Part I Relation Between Space Weather and Society

<b>1</b>	<b>Social Impacts of Space Weather</b> . . . . .	3
	Mamoru Ishii	
<b>2</b>	<b>Impact of Space Weather on Various Fields</b> . . . . .	9
	Yûki Kubo, Susumu Saito, Takuya Tsugawa, Yusuke Ebihara, Tsutomu Nagatsuma, Tatsuhiko Sato, and Hidekatsu Jin	
2.1	Telecommunication and Satellite Navigation . . . . .	9
2.1.1	Structure of Ionosphere . . . . .	10
2.1.2	Communication and Broadcasting . . . . .	12
2.1.3	Positioning . . . . .	21
2.2	Electric Power . . . . .	30
2.2.1	Introduction . . . . .	30
2.2.2	Impacts of GIC on High-Voltage Transmission Network . . . . .	31
2.2.3	Prevention of Hazards Due to GIC . . . . .	31
2.2.4	Causes of GIC . . . . .	34
2.2.5	Forecast of GIC . . . . .	37
2.2.6	Summary . . . . .	39
2.3	Satellites . . . . .	41
2.3.1	Surface Charging . . . . .	41
2.3.2	Internal Charging . . . . .	43
2.3.3	Single-Event Effects . . . . .	45
2.3.4	Total Dose Effect/Cumulative Dose Effect . . . . .	47
2.3.5	Others (Material Degradation and Property Changes in Space Environment) . . . . .	48
2.4	Exposure to Cosmic Radiation . . . . .	50
2.4.1	Introduction . . . . .	50
2.4.2	Regulation for Aircrew Exposure . . . . .	51
2.4.3	Mechanism of Aircrew Exposure . . . . .	52

2.4.4	Aircrew Dose Assessment Models . . . . .	55
2.4.5	Examples of Aircrew Dose Rates Estimated by WASAVIES . . . . .	56
2.4.6	Summary . . . . .	59
2.5	Atmospheric Drag . . . . .	59
2.5.1	Introduction . . . . .	59
2.5.2	Basis 1: Orbits of Objects Orbiting the Earth . . . . .	60
2.5.3	Basis 2: Change in Trajectory Due to External Force . . . . .	62
2.5.4	Factors That Determine Magnitude of Atmospheric Drag . . . . .	63
2.5.5	Variation in Thermospheric Atmospheric Density and its Contribution to Atmospheric Drag . . . . .	67
2.5.6	Influence of Atmospheric Drag on Space Utilization . . . . .	68
2.5.7	Conclusion: Prediction Models for Thermospheric Variability . . . . .	71
	References . . . . .	73
<b>3</b>	<b>Severe Space Weather Disasters . . . . .</b>	<b>81</b>
	Mamoru Ishii	
3.1	Scale and Occurrence Rate of Space Weather Disasters . . . . .	81
3.2	Actions of National and International Organizations for Space Weather Disasters . . . . .	85
3.2.1	National Activities . . . . .	85
3.2.2	Activities of International Organizations . . . . .	85
3.3	Social Impacts of Space Weather Phenomena . . . . .	86
	References . . . . .	91
<b>Part II Geospace and Space Weather Forecast</b>		
<b>4</b>	<b>Introduction of Space Weather Research on Magnetosphere and Ionosphere of the Earth . . . . .</b>	<b>95</b>
	Kazuo Shiokawa	
4.1	Structures of and Variations in Magnetosphere and Ionosphere of the Earth . . . . .	95
4.2	Measurement of Magnetosphere and Ionosphere of the Earth . . . . .	105
	References . . . . .	112
<b>5</b>	<b>Space Radiation . . . . .</b>	<b>115</b>
	Yoshizumi Miyoshi, Yuto Katoh, Shinji Saito, Takefumi Mitani, and Takeshi Takashima	
5.1	Time Variations in Radiation Belts . . . . .	115
5.1.1	Average Variations in Radiation Belt Electrons . . . . .	116
5.2	Solar Wind–Radiation Belt Coupling . . . . .	118
5.2.1	Solar Wind Parameter Dependence . . . . .	119
5.2.2	Solar Wind Structure Dependence . . . . .	120
5.3	Acceleration Mechanisms . . . . .	121

5.3.1	Adiabatic Acceleration Process . . . . .	121
5.3.2	Nonadiabatic Acceleration Process . . . . .	122
5.4	Loss Mechanisms . . . . .	125
5.4.1	Magnetopause Boundary Loss . . . . .	125
5.4.2	Loss Due to Wave–Particle Interactions . . . . .	128
5.5	Forecast of Radiation Belt Electrons . . . . .	130
	References . . . . .	132
<b>6</b>	<b>Geomagnetic Variability and GIC . . . . .</b>	<b>139</b>
	Yusuke Ebihara, Satoko Nakamura, Tada-nori Goto, Shinichi Watari, and Takashi Kikuchi	
6.1	Mechanism of GIC Generation . . . . .	139
6.2	GIC Observations . . . . .	150
6.3	Magnetospheric Ionospheric Current Systems and Geomagnetic Field Fluctuations . . . . .	156
6.3.1	Convection Electric Field, R1FAC, and Shielding Electric Field, R2FAC . . . . .	158
6.3.2	Quasiperiodic DP2 Magnetic Field Fluctuations and Substorms . . . . .	158
6.3.3	Storm Main Phase Electric Field and DP2 Currents . . . . .	162
6.3.4	Wave Phenomena in the Magnetosphere . . . . .	163
6.3.5	Geomagnetically Induced Currents . . . . .	167
6.3.6	Mechanism of Current Flow from Magnetosphere to Low-Latitude and Equatorial Ionosphere . . . . .	167
	References . . . . .	171
<b>7</b>	<b>Ionospheric Variability . . . . .</b>	<b>177</b>
	Yuichi Otsuka, Hidekatsu Jin, Hiroyuki Shinagawa, Keisuke Hosokawa, and Takuo Tsuda	
7.1	Propagation of Radio Waves in Ionosphere . . . . .	177
7.1.1	Introduction . . . . .	177
7.1.2	Reflection and Refraction of Radio Waves in Ionosphere . . . . .	178
7.1.3	Propagation Delay of Radio Waves in Ionosphere . . . . .	179
7.1.4	Absorption of Radio Waves in Ionosphere . . . . .	180
7.1.5	Scintillation . . . . .	180
7.2	Ionospheric Changes Caused by Solar Flares . . . . .	183
7.2.1	Introduction . . . . .	183
7.2.2	Examples of Solar Radiation Variations (X9.3 Flare in September 2017) . . . . .	183
7.2.3	Absorption of Solar Radiation by Upper Atmosphere and Change in Ionization Rate . . . . .	184
7.2.4	Ionospheric Variability . . . . .	186
7.2.5	Variations in Thermosphere . . . . .	187
7.2.6	Conclusion . . . . .	188

7.3	Ionospheric Variations Associated with Geomagnetic Storms . . .	189
7.3.1	Introduction . . . . .	189
7.3.2	Ionospheric Storms . . . . .	189
7.3.3	Evaluation of Magnitudes of Ionospheric Storms . . . . .	192
7.3.4	Large-Scale Traveling Ionospheric Disturbances . . . . .	193
7.3.5	Thermospheric Disturbances and Atmospheric Drag . . . . .	193
7.3.6	Conclusion . . . . .	195
7.4	Ionospheric Variations in Polar Regions . . . . .	196
7.4.1	Recent Observations of Scintillation Associated with Aurora . . . . .	196
7.4.2	Mechanism of Polar Cap Patch Generation and its Relation to TOI/SED . . . . .	196
7.4.3	Ionospheric Irregular Structure and Scintillation Associated with Polar Cap Patches . . . . .	198
7.4.4	Polar Cap Absorption . . . . .	199
7.5	Medium-Scale Propagating Ionospheric Disturbances . . . . .	202
7.5.1	Introduction . . . . .	202
7.5.2	MSTIDs During Daytime . . . . .	203
7.5.3	MSTIDs During Nighttime . . . . .	206
7.6	Plasma Bubbles . . . . .	208
7.6.1	Introduction . . . . .	208
7.6.2	Rayleigh–Taylor Instability . . . . .	209
7.6.3	Characteristics of Plasma Bubble Generation . . . . .	211
7.6.4	Increase in Eastward Electric Field at Sunset . . . . .	212
7.6.5	Prediction of Plasma Bubble Occurrence by Numerical Model . . . . .	213
7.7	Sporadic E Layers . . . . .	214
7.7.1	Introduction . . . . .	214
7.7.2	Effects on Radio Wave Propagation . . . . .	214
7.7.3	Characteristics and Observations of <i>es</i> Layers . . . . .	215
7.7.4	Generation Mechanism: Wind Shear Theory . . . . .	217
	References . . . . .	219

### Part III Solar Storms and Space Weather Forecast

<b>8</b>	<b>Structure of Solar Atmosphere and Magnetic Phenomena . . . . .</b>	<b>225</b>
	Kiyoshi Ichimoto, Toshifumi Shimizu, Kazumasa Iwai, and Hisayoshi Yurimoto	
8.1	Solar Constant and Overall Structure of Solar Atmosphere . . . . .	225
8.2	Photosphere: Interaction of Convection and Magnetic Fields . . . . .	227
8.3	Chromosphere: From Gas-Dominated to Magnetic Field-Dominated . . . . .	231
8.4	Corona and Solar Wind: Hot Atmosphere Dominated by Magnetic Fields . . . . .	234
8.5	Solar Winds and Heliosphere . . . . .	239

8.6	CMEs Recorded in Recovered Samples from Space . . . . .	242
8.6.1	Introduction . . . . .	242
8.6.2	Analytical Method for Solar Wind Implanted in Solids . . . . .	244
8.6.3	Measurements of Solar Wind Collected in Space . . . . .	245
8.6.4	Conclusion . . . . .	248
	References . . . . .	248
<b>9</b>	<b>Origin of Solar Storms . . . . .</b>	<b>251</b>
	Yoichiro Hanaoka, Kyoko Watanabe, and Seiji Yashiro	
9.1	Solar Storm Observation Network . . . . .	251
9.1.1	Capturing Electromagnetic Radiation from Flare . . . . .	252
9.1.2	Capturing Mass Ejections from the Sun . . . . .	254
9.1.3	Capturing High-Energy Particles from the Sun . . . . .	257
9.2	Flare Emission . . . . .	257
9.2.1	Effects of Flare Emission on Space Weather . . . . .	257
9.2.2	Statistical Properties of Flare Emissions . . . . .	260
9.2.3	Flare Emission Model . . . . .	267
9.2.4	Summary and Future Studies . . . . .	272
9.3	Coronal Mass Ejections . . . . .	273
9.3.1	History of CME Observations . . . . .	273
9.3.2	CME Rate . . . . .	276
9.3.3	Halo CME . . . . .	277
9.4	Solar Energetic Particles . . . . .	279
9.4.1	SEP Observation . . . . .	279
9.4.2	Impulsive SEPs and Gradual SEPs . . . . .	280
9.4.3	Gradual SEPs and CMEs . . . . .	281
	References . . . . .	282
