

**12th International Workshop on
Plasma Edge Theory in Fusion Devices**

September 2-4, 2009
Rostov State Historical Museum
Rostov Veliky, Yaroslavskaia Region, Russia

ORIGINAL PAPERS

1. TURBULENCE IN EDGE PLASMA

Page **218–227** ——— V. P. Budaev
Generalized Self-Similarity of Edge Plasma Turbulence in Fusion
Devices

Page **228–241** ——— B. D. Scott, A. Kendl, and T. Ribeiro
Nonlinear Dynamics in the Tokamak Edge

Page **242–245** ——— S. Leerink, V. V. Bulanin, E. Z. Gusakov, J. A. Heikkinen, S. J. Janhunen, T. P. Kiviniemi, T. Korpilo, M. Nora, and F. Ogando
Synthetic Doppler Reflectometer Diagnostic for Nonlinear Global Gyrokinetic Simulations

Page **246–251** ——— V. V. Saenko
Self-similarity of Fluctuation Particle Fluxes in the Plasma Edge of the Stellarator L-2M

Page **252–255** ——— S. J. Janhunen, T. P. Kiviniemi, J. A. Heikkinen, T. Korpilo, S. Leerink, M. Nora, and F. Ogando
Recent Advances in Gyrokinetic Full-f Particle Simulation of Medium Sized Tokamaks with ELMFIRE

2. TRANSPORT IN EDGE PLASMA

Page **256–266** ——— H. Tanaka, N. Ohno, Y. Tsuji, and S. Kajita
2D Statistical Analysis of Non-Diffusive Transport under Attached and Detached Plasma Conditions of the Linear Divertor Simulator

Page **267–272** ——— T. Takizuka, K. Hoshino, K. Shimizu, and M. Yagi
Modelling of Ion Kinetic Effects for SOL Flow Formation

Page **273–278** ——— A. Froese, T. Takizuka, and M. Yagi
Effect of Source and Sink on Heat Transport in the SOL

Page **279–284** ——— Y. Marandet, A. Mekkaoui, D. Reiter, P. Börner, P. Genesio, J. Rosato, H. Capes, M. Koubiti, L. Godbert-Mouret, and R. Stamm
A Statistical Approach to Neutral Transport in Turbulent Plasmas

Page **285–291** ——— V. Sergeev and B. Kuteev
Semi-Analytical Model for Coupling Core and Edge Plasma

Page **292–298** ——— V. Kotov, D. Reiter, D. P. Coster, and A. S. Kukushkin
Verification of the 2D Tokamak Edge Modelling Codes for Conditions of Detached Divertor Plasma

Page **299–305** ——— R. D. Smirnov, A. Yu. Pigarov, S. I. Krasheninnikov, T. D. Rognlien, V. A. Soukhanovskii, M. E. Rensink, R. Maingi, C. H. Skinner, D. P. Stotler, R. E. Bell, and H. W. Kugel
Multi-Fluid Modeling of Low-Recycling Divertor Regimes

Page **306–312** ——— R. Zagórski, G. Telesca, W. Fundamenski, and K. McCormick
Modelling with COREDIV Code of JET ILW Configuration

Page **313–318** ——— E. O. Baronova and V. V. Vikhrev
Modeling of Plasma Parameters during High Pressure Gas Injection with a Three Temperature Model

3. PEDESTAL PHYSICS

Page **319–323** ——— P. J. Catto and G. Kagan
Kinetic Effects in the Pedestal of a Tokamak

Page **324–330** ——— S. Yu. Medvedev, A. A. Ivanov, A. A. Martynov, Yu. Yu. Poshekhonov, R. Behn, Y. R. Martin, J.-M. Moret, F. Piras, A. Pitzschke, A. Pochelon, O. Sauter, and L. Villard
Edge Stability and Pedestal Profile Sensitivity of Snowflake Diverted Equilibria in the TCV Tokamak

Page **331–337** ——— I. Joseph
Magnetic Perturbation Spectrum Produced by Non-Axisymmetric Scrape-Off Layer Current and the X-Point Shadow

Page **338–342** ——— V. Rozhansky, I. Veselova, E. Kaveeva, S. Voskoboinikov, and D. Coster
Towards Modeling of ITER H-mode

Page **343–349** ——— F. de Solminihac, P. Beyer, M. Leconte, S. Benkadda, and X. Garbet
Impact of Single and Multiple Harmonic Magnetic Perturbations on the Transport Barrier Dynamics in a Tokamak

4. POWER AND PARTICLE CONTROL

Page **350–355** ——— M. V. Umansky, T. D. Rognlien, D. D. Ryutov, and P. B. Snyder
Edge Plasma in Snowflake Divertor

Page **356–361** ——— D. Kalupin, Y. Andrew, G. Corrigan, V. Parail, J. Spence, M. Tokar, R. Zagorski, S. Wiesen, and the JET-EFDA Culham Science Centre
Influence of JET Divertor Geometry on the H-Mode Power Threshold

Page **362–367** ——— M. Ishida, K. Maeki, R. Hiwatari, X. Bonnin, S. Zhu, A. Hatayama, R. Schneider, and D. Coster
Numerical Analysis of Divertor Plasma for Demo-CREST

Page **368–373** ——— D. P. Stotler, R. Maingi, L. E. Zakharov, H. W. Kugel, A. Yu. Pigarov, T. D. Rognlien, and V. A. Soukhanovskii
Simulations of NSTX with a Liquid Lithium Divertor Module

5. IMPURITY AND RADIATION

Page **374–379** ——— R. V. Shurygin and D. Kh. Morozov
Turbulent Dynamics of Beryllium Seeded Plasmas at the Edge of Tokamaks

Page **380–385** ——— A. A. Pshenov and D. Kh. Morozov
Stabilization of Radiation-Condensation Instability by Light Impurity Injection

Page **386–391** ——— K. Hoshino, T. Takizuka, and T. Nakano
Accumulation Process of High-Z Impurity in Toroidal Rotating Tokamak Plasma

Page **392–397** — M. Toma, X. Bonnin, K. Hoshino, A. Hatayama, R. Schneider, and D. Coster
 First Steps Towards the Coupling of the IMPGYRO and SOLPS Codes to Analyze Tokamak Plasmas with Tungsten Impurities

Page **398–403** — J. Rosato, D. Reiter, V. Kotov, Y. Marandet, H. Capes, L. Godbert-Mouret, M. Koubiti, and R. Stamm
 Progress on Radiative Transfer Modelling in Optically Thick Divertor Plasmas

Page **404–409** — J. Rosato, F. B. Rosmej, R. Stamm, M. B. Kadomtsev, M. G. Levashova, and V. S. Lisitsa
 Effects of Turbulence on Radiative Properties of Tokamak Edge Plasmas

6. DUST PARTICLES AND PLASMA-MATERIAL INTERACTION

Page **410–425** — S. I. Krasheninnikov, A. Yu. Pigarov, R. D. Smirnov, and T. K. Soboleva
 Theoretical Aspects of Dust in Fusion Devices

Page **426–431** — Y. Tomita, G. Kawamura, Y. D. Pan, and L. W. Yan
 Acceleration and Redeposition of a Dust Particle in SOL/Divertor Plasma of HL-2A Tokamak

Page **432–438** — D. Borodin, A. Kirschner, D. Nishijima, R. Doerner, J. Westerhout, G. J. van Rooij, J. Rapp, A. Kreter, R. Ding, A. Galonska, and V. Philipps
 Modelling of Impurity Transport in the Linear Plasma Devices PISCES-B and Pilot-PSI Using the Monte-Carlo Code ERO

Page **439–444** — L. Aho-Mantila, M. Wischmeier, M. I. Airila, A. V. Chankin, D. P. Coster, Ch. Fuchs, M. Groth, A. Kirschner, K. Krieger, H. W. Müller, E. Wolfrum, and the ASDEX Upgrade Team
 Modelling of Carbon Transport in the Outer Divertor Plasma of ASDEX Upgrade

Page **445–450** — D. Kato, T. Kenmotsu, K. Ohya, and T. Tanabe
 Linear Polarization of Photons Emitted from Excited Hydrogen Atoms Formed above Metal Surfaces

- Page **451–457** ——— G. Kawamura, Y. Tomita, M. Kobayashi, M. Tokitani, S. Masuzaki, and A. Kirschner
Analysis of Carbon Deposition on the First Wall of LHD by Monte Carlo Simulation
- Page **458–463** ——— K. Inai, K. Ohya, G. Kawamura, and Y. Tomita
Electron Velocity Distribution at a Sheath Edge in the Presence of Secondary Electron Emission From a Metal Surface
- Page **464–469** ——— A. Ito, K. Ohya, K. Inai, and H. Nakamura
Dependency of Tritium Retention in Graphite on Temperature Control of Molecular Dynamics
